Preface

The idea of preparing a manual for the statistical variables resulted from the efforts made by PCBS since its establishment in adopting the policy of documenting the best practices in all aspects of its work. The efforts aim to create a professional framework that governs PCBS performance in implementing surveys and disseminating their results nationally to be used by all employees in the statistical units in ministries and government institutions, and that largely contributes to the development of the National Statistical System.

In order to ensure the proper and homogeneous application, we have issued many manuals to standardize the statistical language and to be the basic foundation for building the general national framework for metadata, such as a manual for statistical indicators, a glossary of statistical terms, and the last of which is this manual of statistical variables.

The importance of preparing this manual stems from the fact that it contains all the statistical variables used by PCBS, and ensures the standardization of the statistical variables adopted and their definitions wherever they are used in surveys, censuses and administrative records. They are classified according to statistical areas and subjects, in addition to the possibility of linking these variables with other descriptive data such as indicators, terms and classifications, which will be provided in the future in a database linked to indicators and terms.

PCBS hopes that this Manual will add a new step towards facilitating the work and developing official statistics in accordance with the statistical best practices.

Chapter One

Introduction

The metadata system is considered one of the main bases in the work of the National Statistical System, which consists of a set of rules and processes for preserving, producing and disseminating statistical metadata according to specific standards that meet the needs of all users. One of those important rules is the manual for statistical variables, where variables are considered as a tool for producing statistics through surveys, administrative records, censuses, time series, and building data collection tools.

The availability of the statistical variables manual allows studying the status of statistical variables at PCBS and the possibility of linking them in the future with relevant terms and indicators to come up with clear criteria that would lead to building an integrated descriptive database.

In order to compile the statistical variables used at PCBS over the course of its work for years, the compilation was based on the following criteria:

- Determining the needs of statistics producers in the statistical fields and topics at PCBS, ministries and national institutions.
- Variables should be clear, explicit and indicative of the basic measurements when used in the collection and production of statistical data.
- Variables should be generally consistent with international standards and the standards followed globally.
- Variables should be based on well-known and documented sources and can be continuously updated over time.

The availability of the statistical variables manual enables the National Statistical System to achieve:

1. Unification and standardization of statistical variables and their metadata.
2. Comprehensive documentation of all statistical variables in all their categories.
3. Facilitating users' access to statistical variables.
4. Maintaining the logical integrity of the data collection tools.
5. Facilitating the work of statisticians, methodologies and information technology in the production and dissemination of statistical data.
6. The ability to exchange statistical data and metadata at the national and international levels.
7. Enhancing the flexibility of the National Statistical System work to respond to the requirements of the rapid developments of information technology and statistical data.

Chapter Two

Statistical Variable

The statistical variable in statistics is defined as the feature or characteristic of a statistical unit to which a numerical measure or category is assigned, and the value of the measurement may vary from one statistical unit to another (at least two values or two categories) e.g. gender has two categories: male and female. The variables can be quantitative such as the number of school years, age and income, or qualitative such as the educational level and gender. The quantitative variables are divided into a continuous variable that takes any possible value such as income and a separate variable that takes specific values such as the number of school years, age in years, or the number of family members.

Classification of Statistical Variables:

Statistical variables are documented from their main sources, such as survey questionnaires, administrative records templates, and statistical indicators manual. The variables are classified as follows:

1. Metadata variables for statistical units, where each statistical unit has its own metadata such as the location of the governorate, locality, enumeration area number, name of the head of the family, name of the individual, trade name of the establishment...etc.
2. Variables of the characteristics of statistical units (establishment, household, individual, agricultural holding... etc.), which are qualitative variables such as the economic activity of the establishment / institution or legal entity, gender of individuals, and other variables such as the relationship to the head of the household, type of agricultural holding... etc.
3. Variables whose data are available to disseminate statistical indicators.
4. Unpublished variables that have indicators and might be used to derive variables to disseminate statistical indicators.
5. Derived variables which are the result of an arithmetic operation of a variable or a number of variables or a recoding process of variables.
6. Parallel data variables (parameters) that are used in monitoring and controlling survey management, such as the date of completing the form, number of field visits, interview result, interview duration... etc.

Variable documentation criteria:

Statistical variables are documented according to the following criteria:

1. Documenting all variables with all their previous classifications.
2. Documenting all variables so that each item is documented for a unit.
3. Repeating variables is not allowed in more than one topic.
4. Documenting each statistical topic separately.
5. Placing the variable within its main topic.

6. Writing the description of the variable so that it expresses the measurement of the variable when collecting or deriving data.
7. The main variables under which the detailed variables fall. These details are placed within the variable details column. An example on this, a question about the durable goods of the household (a private car, an electric refrigerator, a freezer, a TV...etc). The main variable is the availability of durable goods for the household, and the durable goods are placed in the column detailing the variable. Another example is the question on the use of agricultural applications. Agricultural applications are placed within the column detailing the variable.
8. Providing sufficient descriptive data for statistical variables, including variable description, variable definition, variable values and description, variable measurement, derived and non-derived variable classification, and variable disaggregation levels.

Chapter Three

How to Use the Manual

Variables Manual is available in hardcopy and softcopy. The variables were grouped and arranged according to the area and subjects in a similar way to the Indicators Manual and the Glossary of Statistical Terms, where a topic on the general economy within the area of economic variables was added and it includes the common variables for all economic subjects.

The Standards for Sorting and Coding Variables:

1. Arranging the variables according to the statistical area and subject in a manner similar to the Indicators Manual and Glossary of Statistical Terms.
2. Encoding the variables based on the area, the subject, and the sequence of the variable within the topic, where the variable was given a code consisting of (7) digits; the first and second digits represent the statistical area, the third and fourth digits represent the statistical subject within the area, and the last three digits on the right represent the serial number of the variable within the statistical subject.

Example: The code (1500001) refers, from left to right, to the following:

- The area of economic variables, coded (15)
 - The subject of general economics (1500), which consists of the code of the area of economic variables (15) and the code of the subject of general economics within the area, which is (00).
 - The serial number of the variable (001) refers to the variable No. (1) in the subject (the number of actual work months during the year of the survey).
3. The coding system allows adding new topics within the area or new variables within the same subject as in the Indicators Manual and the Glossary of Statistical Terms in order to facilitate linking the Variables to the Indicators Manual and the Glossary of Statistical Terms.

The following table shows the encoding of the statistical areas and subjects:

Area	Area Code	Subject Name	Subject Code
Economic Variables	15	General Economy	1500
		National Accounts	1510
		Balance of Payments	1515
		Foreign Investment	1516
		Foreign Trade	1520
		Price Indices	1525
		Construction and Establishments	1530
		Transportation	1535
		Transport and Storage	1536
		Transportation sector (Outside Establishments)	1537
		Telecommunications	1540
		Olive Presses	1555
		General Government Finance	1560
		Finance and Insurance	1561
Satellite Accounts	1565		
Geographical and Environment Variables	20	Tourism	2010
		Housing and Housing Conditions	2015
		Environment	2020
		Water	2025
		Energy	2030
		Land Use	2035
		Agriculture	2040
Population and Social Variables	25	Population & Demography	2510
		Labour	2515
		Information & communication Technology	2520
		Living Standards	2525
		Education & Culture	2530
		Health	2535
		Gender	2546
Martyrs & Detainees Variables	40	Detainees & Martyrs	4010
Governance and Rule of Law Variables	45	Security and Justice	4510
		Governance and Democracy	4515
Identification Data and Paradata Variables	50	Identification Data	5010
		Paradata	5020

Chapter Four

Statistical Variables

Area	Subject	Variable Code	Variable	Variable Definition	Variable Measurement 1. Quantative 2. Qualitative	Variable Classification 1. Non Derived 2. Derived	Variable Values	Variable Value Label	Level of Details		Term Code or Indicator Code
									Sub Variable Code	Sub Variable label	
Economic Variables											
General Economy Variables								Subject code :1500			
15	General Economy	1500001	Number of actual work months during the survey year	Number of work months in which the enterprise carried out its activities in the reference year.	1	1	Number				
15	General Economy	1500002	Fiscal year for the enterprise	The reference period for the final accounts of the enterprise is a calendar year.	1	1	Number				
15	General Economy	1500003	Data source from the enterprise	The data source used for completing the questionnaire is from the enterprise.	2	1	1	Financial books and records			
							2	Estimates			
							3	Both			
15	General Economy	1500004	Type of currency used in completing the data	Type of currency used in completing the data of the enterprise.	2	1	1	Jordanian Dinar JD			
							2	US Dollar(\$)			
							3	New Israeli Shekel NIS			
15	General Economy	1500005	The enterprise work at economically feasible prices	If the establishment earns revenues (without grants and aid) that cover its expenses, then it works at feasible prices, but if its revenues do not cover its expenses, then it does not work at feasible prices.	2	1	1	Yes			
							2	No			

Area	Subject	Variable Code	Variable	Variable Definition	Variable Measurement 1. Quantative 2. Qualitative	Variable Classification 1. Non Derived 2. Derived	Variable Values	Variable Value Label	Level of Details		Term Code or Indicator Code

							2	Water filtration using fabric			
							3	Precipitating of suspended solids from water by gravity			
							4	Others, specify.....			
20	Environment	2020006	Re-use of treated wastewater	If there is a re-use of treated wastewater or not.	2	1	1	Yes			
							2	No			
20	Environment	2020007	Number of disposal times for wastes	Number of disposal times for wastes within a specific period.	1	1	Number				

Area	Subject	Variable Code	Variable	Variable Definition	Variable Measurement 1. Quantative 2. Qualitative	Variable Classification 1. Non Derived 2. Derived	Variable Values	Variable Value Label	Level of Details		Term Code or Indicator Code
									Sub Variable Code	Sub Variable label	
20	Environment	2020008	Solid waste types generated by the establishment	Types of generated solid waste which is produced by the establishment by components.	2	1	1	Paper and cartoon			Term 2020168 Indicator 2020035
							2	Plastic and Rubber			
							3	Glass and Metals			
							4	Soil and Stones			
							5	Organic Waste			
							6	Sharp waste			
							7	Infectious waste			
							8	Chemical waste			
							9	Radioactive waste			
							10	Others specify,.....			
20	Environment	2020009	Periodicity of Non-Separated Solid Waste Collection inside the establishment	Periodicity of Non-Separated Solid Waste Collection inside the establishment within a specified period: week or month.	2	1	1	1-3 times			Indicator 2020033
							2	4-6 times			
							3	7 times and more			
20	Environment	2020010	Transportation Method of Solid waste inside the Establishment	Transportation Method of solid waste inside the establishment whether it is manual, or special tools, or both.	2	1	1	Manual			Indicator 2020033
							2	Special tools			
							3	Both methods			

Area	Subject	Variable Code	Variable	Variable Definition	Variable Measurement 1. Quantative 2. Qualitative	Variable Classification 1. Non Derived 2. Derived	Variable Values	Variable Value Label	Level of Details		Term Code or Indicator Code
									Sub Variable Code	Sub Variable label	
20	Environment	2020011	How to Deal Directly with the Solid Waste after Collection from the Establishment	How to Deal Directly with the Solid Waste after Collection from the Establishment (Transferred to the nearest container, Collected directly from establishment by the local authority, Transferred to the nearest landfill waste, Thrown randomly, or others).	2	1	1	Transferred to the nearest container			Indicator 2020033
							2	Collected directly from establishment by the local			
							3	Transferred to the nearest landfill waste			
							4	Thrown randomly			
							5	Others			
20	Environment	2020012	The construction material of the used container	The construction material of the used container and its classification if it's open or closed, or it is owned by the municipality, or the establishment itself.	2	1	1	Municipality open container			Indicator 2020033
							2	Municipality closed container			
							3	Establishment open container			
							4	Establishment closed container			
20	Environment	2020013	The doer who is responsible of transporting solid waste to the final disposing place	The doer who is responsible of transporting solid waste to the final disposing place whether if it is the Establishment or the local authority, or the private contractor, or UNRWA, or others.	2	1	1	The Establishment			Indicator 2020033
							2	Local Authority			
							3	Private Contractor			
							4	UNRWA			
							5	Others			

Area	Subject	Variable Code	Variable	Variable Definition	Variable Measurement 1. Quantitative 2. Qualitative	Variable Classification 1. Non Derived 2. Derived	Variable Values	Variable Value Label	Level of Details		Term Code or Indicator Code
									Sub Variable Code	Sub Variable label	
20	Environment	2020014	Wastewater Disposal Method in the establishment	Wastewater Disposal Method in the establishment whether it is Wastewater Network, or tight cesspit, or porous cesspit, or others.	2	1	1	Wastewater Network			Indicator 2020032
							2	Tight Cesspit			
							3	Porous Cesspit			
							4	Others			
20	Environment	2020015	Wastewater Disposal Method for the household	Wastewater Disposal Method in the household, whether it is Wastewater Network, or tight cesspit, or porous	2	1	1	Wastewater network			Indicator 2020032
							2	Tight cesspit			
							3	Porous cesspit			
							4	Others			
20	Environment	2020016	Disposal Method of Solid Waste	Disposal Method of Solid Waste whether its thrown in the nearest container, or burned, or thrown into a dumping site, or thrown randomly or others.	2	1	1	Thrown in the nearest container			Indicator 2020033
							2	Burned			
							3	Thrown into a dumping site			
							4	Thrown randomly			
							5	Others			
20	Environment	2020017	Household solid waste components	Household solid waste components and its divided by its components.	2	1	1	Baby's nabs			Indicator 2020035
							2	Food wastes			
							3	Paper and cartoon			
							4	Agricultural waste			
							5	Plastic			
							6	Others			
20	Environment	2020018	Type of external influences	Type of external influences that households and establishments are exposed to whether they are noise, or smell, or dust, or smoke.	2	1	1	Exposure to noise			Indicator 2020034
							2	Exposure to smell			
							3	Exposure to dust			
							4	Exposure to smoke

20	Agriculture	2040005	livestock raising System	It refers to the general practices and characteristics of livestock raising by holding in terms of the method of raising, feeding and production.semi-nomadic livestock on the holding . Semi-intensive farming: the adoption of animals feeding on grazing plus feed to provide supplementary nutrition. Ranching: raising animals in barns on feed without outside grazing.	2	1	1	Ranching			Term 2040224
							2	Semi-nomadic			
20	Agriculture	2040006	Poultry raising system	The method used in raising poultry in the holding, which depends on the place of breeding, in closed, semi-closed, or open place.	2	1	1	Closed			
							2	Open			
							3	Semi-Closed			

Area	Subject	Variable Code	Variable	Variable Definition	Variable Measurement 1. Quantative 2. Qualitative	Variable Classification 1. Non Derived 2. Derived	Variable Values	Variable Value Label	Level of Details		Term Code or Indicator Code
									Sub Variable Code	Sub Variable label	
20	Agriculture	2040007	Main Purpose of raising Animal	The main purpose of raising animal in agriculture holding, either it is mainly for milk or mainly for meat, where mainly it means more than half of the agricultural production for the agriculture holding during the agricultural year.	2	1	1	Mainly for meat			Term 2040192
							2	Mainly for milk			
20	Agriculture	2040008	Type of Domestic Poultry	Type of Domestic Poultry which raised in the agriculture holding, that includes broilers and laying chickens, turkey, Common quail, rabbits, pigeons, ducks, and others.	2	1	1	Chickens			Term 2040257
							2	Turkeys			
							3	Pigeons			
							4	Rabbits			
							5	Others			
20	Agriculture	2040009	Number of Domestic Poultry	Number of Domestic Poultry which raised in the agriculture holding as it is in reference day.	1	1	Number		204000901	Number of Chickens	Term 2040257 Indicator 2040006
									204000902	Number of Turkeys	
									204000903	Number of Pigeons	
									204000904	Number of Rabbits	
									204000905	Number of Others domestic poultry	
20	Agriculture	2040010	Strain of Cattle	Classification of Cattle according to a set of external and productive genetic traits.	2	1			1	Local	Term 2040174
									2	Friesian	
									3	hybrid	
									4	other	
20	Agriculture	2040011	Number of Cattle	Total number of cattle in agriculture holding as in reference day.	1	1	Number		204001101	Number of Local cattle	Indicator 2040016
									204001102	Number of Friesian cattle	
									204001103	Number of hybrid cattle	
									204001104	Number of Other cattle

20	Agriculture	2040016	Person in Employment	Employment for all categories to which it applies, concept of employment (individuals in the working age), family member, temporary and permanent paid employment.	2	1	1	Temporary Unpaid Family Members			
							2	Permanent Unpaid Family Members			
							3	Temporary Wage Employees			
							4	Permanent Wage Employees			
20	Agriculture	2040017	Number of Agricultural Employees	Number of Agricultural Employees during the reference period.	1	1	Number		204001701	Number of temporary unpaid family members	Term 1530121
									204001702	Number of permanent unpaid family members	
									204001703	Number of Temporary wage	
									204001704	Number of Permanent wage	
20	Agriculture	2040018	Type of Holding	Type of agricultural holding, which includes plant, animal and mixed holding.	2	1	1	Plant Holding			
							2	Animal Holding			
							3	Mixed Holding			
20	Agriculture	2040019	Type of Nurseries	The type of the nursery according to the type of plants, trees or grapes that are propagated in the nursery without the need to harvest their fruits.	2	1	1	Horticulture			
							2	Vegetable			
							3	Mixed			
							4	Forest plant			
							5	Ornamental plants			
							6	Other			

Area	Subject	Variable Code	Variable	Variable Definition	Variable Measurement 1. Quantitative 2. Qualitative	Variable Classification 1. Non Derived 2. Derived	Variable Values	Variable Value Label	Level of Details		Term Code or Indicator Code
									Sub Variable Code	Sub Variable label	
20	Agriculture	2040020	Nurseries Area	It is an area where young plants, trees or vines are propagated for the purpose of transplanting. Plants in a nursery are not harvested and are therefore not included in the area (temporary crops) or current area (Permanent crops). A nursery might be in the open or under protective cover. It may be used for the development of planting materials for the holding itself or for sale.	1	1	Area		204002001	Area of horticulture nurseries	Terms 2040201 2040202 2040203 2040204 2040205 2040206
									204002002	Area of vegetable nurseries	
									204002003	Area of Mixed nurseries	
									204002004	Area of the forest plant nurseries	
									204002005	Area for ornamental plants nurseries	
									204002006	Area of other nurseries	
20	Agriculture	2040021	Type of Equines	Type of work animals in the holding.	2	1	1	Horses			
							2	Mule			
							3	Donkeys			
20	Agriculture	2040022	Number of work animals	Number of work raised in the holding as in census reference day.	1	1	Number		204002201	Number of horses	Indicator 2040021
									204002202	Number of mules	
									204002203	Number of donkeys	
20	Agriculture	2040023	Type of Agriculture Production	The type of agricultural production include plant sector (fruits, wood, straw and hay, ...) or livestock sector (meat, milk, eggs, honey, newborns, chicks, wool and hair, fish).	2	1	1	Plant Production			Indicator 2040001
							2	Livestock Production			

Area	Subject	Variable Code	Variable	Variable Definition	Variable Measurement 1. Quantitative 2. Qualitative	Variable Classification 1. Non Derived 2. Derived	Variable Values	Variable Value Label	Level of Details		Term Code or Indicator Code
									Sub Variable Code	Sub Variable label	
20	Agriculture	2040024	Type of Poultry	The type of poultry raised in the holding which includes Broilers Mothers, broiler, Layers, turkeys, and Common Quail.	2	1	1	Broilers Mothers			
							2	Broilers			
							3	Layers			
							4	Turkeys			
							5	Common Quails			
20	Agriculture	2040025	Number of Poultry	Number of Poultry raised in the holding as in census reference day.	1	1	Number		204002501	Number of Broilers Mothers	
									204002502	Number of Broilers	
									204002503	Number of Layers	
									204002504	Number of Turkeys	
									204002505	Number of Common Quails	
20	Agriculture	2040026	Type of Crop	Type of crops in the holding according the status of crop and agriculture sessions which includes field crops, vegetables for both open, protected and horticultural trees.	2	1	1	Field Crops			
							2	Vegetables			
							3	Horticulture Trees			
20	Agriculture	2040027	Area of Crop	Area of field Crops, vegetables, and horticulture trees in the holding during the reference period.	1	1	Area		204002701	Area of field Crops	Term 2040219 Indicator 2040055
									204002702	Area of vegetables	
									204002703	Area of horticulture Trees	
20	Agriculture	2040028	Method of Farming	Method of farming which used in the holding can be compact or scattered.	2	1	1	Compact			
							2	Scattered			
20	Agriculture	2040029	Status of Crop	Status of crop in the holding that can be single, associated, or mixed crops.	2	1	1	Single			
							2	Associated			
							3	Mixed			

Area	Subject	Variable Code	Variable	Variable Definition	Variable Measurement 1. Quantitative 2. Qualitative	Variable Classification 1. Non Derived 2. Derived	Variable Values	Variable Value Label	Level of Details		Term Code or Indicator Code
									Sub Variable Code	Sub Variable label	
20	Agriculture	2040030	Type of Irrigation	Type of Irrigation if it is Irrigated or Rain fed.	2	1	1	Rain fed			
							2	Irrigated			
20	Agriculture	2040031	Method of Irrigation	The main method of irrigation that is used in the holding which includes Surface, Drip, or Sprinkler.	2	1	1	Surface			
							2	Drip			
							3	Sprinkler			
20	Agriculture	2040032	Type pf Protection	The type of protection used to protect vegetables in the holding for each parcel separately which includes surface tunnel, French tunnel, or plastic house.	2	1	1	Surface Tunnel			
							2	French Tunnel			
							3	Plastic House			
20	Agriculture	2040033	Specialization of Veterinaries	The last specialty degree studied by veterinarian.	2	1	1	Veterinary			
							2	The Animal Health			
							3	The Veterinary Science			
20	Agriculture	2040034	Type of Machines and Equipment	Type of Machines and Equipment which is owned or rented and used in the holding during the reference period.	2	1		As in the agricultural classification manual 2019			
20	Agriculture	2040035	Type of Agricultural Cooperative Societies	The type of the cooperative society which provides the required supply to farmers within specialization in addition to the financial support to the various sectors within the cooperative work area.	2	1	1	Agricultural Production			
							2	Livestock and Poultry Breeding			
							3	Bees Breeding			
							4	Agricultural Services			
							5	Olive Pressing			
							6	Marketing Lending and Supply of Inputs			
							7	Others

20	Agriculture	2040036	Main Occupation of Holder	Main Occupation of the Holder if it is agriculture or other than agriculture.	2	1	1	Agriculture			Term 2040221
							2	Other Than Agriculture			
20	Agriculture	2040037	Main Purpose of Production	It is the main purpose of the production, which is either for sale only or for sale mainly with some household consumption or mainly for household consumption with the sale of part of the production or for household consumption only.	2	1	1	For sale only			Term 2040191
							2	Mainly for sale with some own consumption			
							3	Mainly for own consumption with sale of part of the production			
							4	Only for own consumption			
20	Agriculture	2040038	Holding Management Method	A method which is used for daily supervision of agricultural holdings, including workers, irrigation, fertilization... etc., which is the holder himself, paid manager or member of the	2	1	1	Holder Himself			Term 2040109
							2	Paid Manager			
							3	Member of the Holder's Family			

Area	Subject	Variable Code	Variable	Variable Definition	Variable Measurement 1. Quantitative 2. Qualitative	Variable Classification 1. Non Derived 2. Derived	Variable Values	Variable Value Label	Level of Details		Term Code or Indicator Code
									Sub Variable Code	Sub Variable label	
20	Agriculture	2040039	Land Tenure	The arrangements or rights under which the holder operates the land making up the holding. Land rented to another person is not considered part of the tenure may be owned or rented or government or any other form.	2	1	1	Owned or Owned Like Possession			Term 2040339
							2	Rented for an agreed amount of money			
							3	Rented for a share of the production			
							4	Held under tribal or traditional form			
							5	Government or Waqf land			
20	Agriculture	2040040	Main Source of Irrigation	It is the most source used in Agricultural holding for different purposes as follows:- Rainwater harvesting wells, Artesian Wells, Public Network, Springs, Tanks and Other Sources.	2	1	1	Rainfed			
							2	Artesian Wells			
							3	Streams and Valleys			
							4	Dug Well			
							5	Tanks, Ponds and Wells			
							6	Springs			
							7	Public Network			
							8	Tanks			
							9	Treated Water			
							10	Other Sources

Identification Data and Paradata Variables

Identification Data Variables							Subject Code: 5010				
50	Identification Data	5010001	The serial number of questionnaire in the sample	A sequential number of the statistical unit in the sample, and the sample is a subset of the statistical population that is selected and arranged according to certain criteria.	2	1					
50	Identification Data	5010002	Establishment serial Number	A number given to an economic entity capable of owning assets, bearing obligations, carrying out economic activities, and entering into transactions with other	2	1					
50	Identification Data	5010003	Establishment serial Number	A number given to the group of activities and resources managed by a single owner or department to produce a homogeneous group of goods and services, usually in a single geographical location.	2	1					

Area	Subject	Variable Code	Variable	Variable Definition	Variable Measurement 1. Quantitative 2. Qualitative	Variable Classification 1. Non Derived 2. Derived	Variable Values	Variable Value Label	Level of Details		Term Code or Indicator Code
									Sub Variable Code	Sub Variable label	
50	Identification Data	5010004	Trade Name	The official name of the establishment registered with the official registration authorities, which is the name or title chosen by the owner of the facility and approved by the Ministry of National Economy as a recognized name for the establishment in official transactions.	2	1					
50	Identification Data	5010005	The name of the owner of the establishment	The name of the ordinary or legal person (or group of persons) who owns the establishment, and who uses the establishment for his own account. As for the manager, he is the person who is responsible for managing the enterprise, and he may not be the same owner of the establishment.	2	1					
50	Identification Data	5010006	Governorate	It is an administrative area, and the Palestinian territories include 16 governorates according to the administrative divisions approved at the end of 1997.	2	1					

Area	Subject	Variable Code	Variable	Variable Definition	Variable Measurement 1. Quantitative 2. Qualitative	Variable Classification 1. Non Derived 2. Derived	Variable Values	Variable Value Label	Level of Details		Term Code or Indicator Code
									Sub Variable Code	Sub Variable label	
50	Identification Data	5010007	Locality	An area of the land surface, permanently inhabited and officially recognized and having its own administrative authority (such as a municipal council, village council, local development committee).	2	1					
50	Identification Data	5010008	Enumeration area number	A serial number given to a specified geographical area on maps, which have been identified on reality with clear borders such as (roads, pathways, walls, natural area, administrative boundaries) and it may be a part of a large locality, or a small whole village (small locality regardless of the number of housing units)	2	1					

Area	Subject	Variable Code	Variable	Variable Definition	Variable Measurement 1. Quantitative 2. Qualitative	Variable Classification 1. Non Derived 2. Derived	Variable Values	Variable Value Label	Level of Details		Term Code or Indicator Code
									Sub Variable Code	Sub Variable label	
50	Identification Data	5010009	Building serial number	A serial number for each free-standing structure that is fixed on the ground or on the water, permanently or temporarily, and the building is surrounded by four walls or the ceiling for at least one floor. This is regardless of the material from which it is built, regardless of the purpose of its creation, and how it is currently used.	2	1					
50	Identification Data	5010010	Housing unit number	A number given to a building or part of a building intended for the housing of one household, and that has a separate door or entrance, or more than one entrance that leads to the road or public corridor without going through another housing unit.	2	1					
50	Identification Data	5010011	Establishment address	Detailed address to reach the establishment at any time, and the address includes the province, the locality, the street, the name of the building or the name of its owner.	2	1					

Area	Subject	Variable Code	Variable	Variable Definition	Variable Measurement 1. Quantative 2. Qualitative	Variable Classification 1. Non Derived 2. Derived	Variable Values	Variable Value Label	Level of Details		Term Code or Indicator Code
									Sub Variable Code	Sub Variable label	
50	Identification Data	5010012	Household serial number	A number given to an individual or group of individuals, related or not related, who reside in one dwelling, and share food or any other living arrangement.	2	1					
50	Identification Data	5010013	Landline / fax number	A telephone or fax number in the establishment's wireline communication	2	1					
50	Identification Data	5010014	Mobile phone number	A telephone number in the corporate wireless communication network.	2	1					
50	Identification Data	5010015	The webpage	The website address of the website through which information and documents that are published on the Internet by an establishment or person are accessed.	2	1					
50	Identification Data	5010016	Email (email)	The e-mail address through which the exchange of electronic messages takes place.	2	1					
50	Identification Data	5010017	Postal Box (PO Box)	The mailbox address is located in the post office in a specific area, through which messages are exchanged.	2	1
