## **Notice to users of this report**

PCBS would like to indicate to users of this press release that the data presented is at constant prices, where the year 1997 is the base year.

PCBS indicates also that all data related to quarters of the year 2005 will be revised based on the availability of the related short-term indicators for those quarters. Meanwhile, data for the first quarter of the year 2005 represents preliminary estimates (flash estimates) issued for the first time in accordance with the estimated short-term indicators; data will be revised when the necessary short-term indicators are available within the requested periodicity.

Based on the international recommendations for the compilation of the QNA revisions, the final report of the Quarterly National Accounts will be released after finalizing the Annual National Accounts for Production and Expenditure sides at constant prices.

## **Press Release**

### **Main Estimates for the Gross Domestic Product (First Quarter 2005)**

#### **In the First Quarter 2005, GDP grew by 1.8% compared with the fourth quarter 2004**

This quarterly report is based on a number of short-term economic indicators compiled quarterly and covering various economic activities. Therefore we compare the main macroeconomic indicators in order to provide an informative tool for monitoring the economy in the short term. In this release we present a comparison with the previous quarter (Fourth Quarter 2004) and the parallel quarter of the previous year 2004 (First Quarter 2004).

#### **GDP for the year 2005**

The preliminary estimates for the year 2005 at constant prices based on the available short term indicators showed that the value of the GDP of the Remaining West Bank and Gaza Strip will reach US\$ 4,254.6 million with an increase of 3.0%. Therefore, the value of GDP per capita will be US\$ 1,210.9 during the year 2005 with a substantial decline of 0.6% compared to the year 2004.

#### **GDP grew in the First Quarter 2005**

The preliminary estimates at constant prices for the first quarter of 2005 show substantial increase in the performance of the economy in the Remaining West Bank and Gaza Strip. The GDP estimates increased substantially during the first quarter of 2005 by 1.8% compared with the fourth quarter of the previous year, and showed a decrease of 0.7% compared to the first quarter of the year 2004 at constant prices.

This growth in the first quarter of the year 2005 compared to the fourth quarter of the previous year was a result of the growth in the main economic activities within the available short term indicators for each activity. There was growth in the Mining, Wholesale and Retail Trade, Hotels, Education in addition to Public Administration and Defense.

In addition, the preliminary estimates for the Gross Domestic Product per capita for the Remaining West Bank and Gaza Strip during the first quarter 2005 increased by 1.4% compared to the fourth quarter of the previous year, while it showed a decrease of 3.7% compared to the same quarter of the year 2004.

#### **Performance of Main Economic Activities**

The performance of different activities during the first quarter of the year 2005 compared to both the fourth quarter of the year 2004 and the same quarter of the previous year was as follows:

- The gross value added for **Agriculture** activity declined by 9.3% during the first quarter of 2005 in relation to the fourth quarter, while it declined substantially by 25.9% compared with the parallel quarter of the year 2004.
- The gross value added for **Manufacturing** activities in Remaining West Bank and Gaza Strip declined during the first quarter 2005 compared to the fourth quarter of the year 2004 by 6.4%, while it declined by 12.0% compared to the first quarter of the year 2004.
- The gross value added for **Construction** activity declined by 1.9% during the first quarter of the year 2005 compared to the fourth quarter 2004; however this activity recorded an increase of 3.4% compared to the same quarter of the year 2004.

- The gross value added for **Transport** grew during the first quarter of the year 2005 by 29.7% compared to the fourth quarter of 2004. On other hand, this activity decreased by 15.6% compared to the first quarter of the year 2004.
- The gross value added for **Financial Intermediation** activity decreased by 7.7% during the first quarter 2005 compared to the fourth quarter of the year 2004, while it increased by 5.3% compared to the first quarter of the year 2004.
- The gross value added grew for **Wholesale and Retail Trade** by 17.3% compared to the fourth quarter of the year 2004; however, when compared to the same quarter of the year 2004, this activity recorded a growth rate of 7.6%.
- The gross value added for **Education** grew during the first quarter of the year 2005 by 9.6% compared to the fourth quarter of the previous year, while it showed an increase of 8.4% compared to the first quarter of the year 2004.
- The gross value added for **Hotels** grew by 16.3% compared to the fourth quarter of the year 2004, while it increased by 27.1% compared to the first quarter of the year 2004.
- The gross value added for **Real Estate, Renting and Business Services** declined by 14.3% during the first quarter of the year 2005 compared to the fourth quarter of the previous year, and decreased by 7.5% compared to the parallel quarter of the year 2004.

The following graph shows the general trend for the quarterly GDP during the various quarters of the years 2004 and 2005:

**Figure1: Comparison for the Quarterly GDP between the First Quarter of the Year 2005 with the Parallel Quarters of the Years 2003 - 2004**

**Figure 2: The General Trend for the Quarterly GDP in the Remaining West Bank and Gaza Strip 2004-2005**

## **Concepts and Definitions**

### **Statistical Unit**

The United Nations System of National Accounts SNA 1993 defines two main types of statistical units:

#### **- Institutional Unit-Enterprise**

An institutional unit is an economic entity that is capable, in its own right, of owning assets, incurring liabilities and engaging in economic activities and in transactions with other entities.

#### **- Establishment**

An establishment is an enterprise, or part of an enterprise, which produces only a single group of goods (with the possibility of production from secondary activities) in which the principal productive activity accounts for most of the value added.

Breaking down institutional units into establishments serves to create more consistent statistical units in the productive sense.

### **Principal Economic Activity**

It is the main activity of the enterprise during the reference year, using (ISIC-3) for classification and coding.

### **Output**

Value of goods and services, including own-account goods, produced during a specific period.

### **Value added**

Value added is a central concept of production and refers to the generated value of any unit that carries out any productive activity. Gross value added is defined as the value of gross production less the value of intermediate consumption. The net value added is defined as the gross value less the value of fixed capital consumption. The net value added reflects the performance of the economy in a better way; however, since it is difficult to measure the fixed capital consumption accurately, the concept of gross value added is more frequently used.

Value added at producers' price is the difference between output at basic prices and the value of the intermediate consumption at purchase price plus taxes (less subsidies) on production. However, if taxes and subsidies are excluded, value added will be obtained in basic prices.

### **Gross Domestic Product or GDP**

Gross Domestic Product or GDP is the summary measure of the output or production during a certain period in time. Estimate of GDP, like the output and the value added, can vary according to taxes and subsidies taken into consideration. GDP is usually estimated at market prices, producers' prices, or basic prices.

### **Deflating**

Changing all data at current prices to constant prices by choosing the suitable indices by which the effect of prices on the data will be isolated, and choosing suitable base year in order to do this.

**Short-term indicators**

All indicators that have a periodicity for less than a year, usually a month or quarter.

**Industrial Production Index**

A statistical tool used for measuring the change in volume of output of industrial activities during a certain period of time. The index uses the change in volume of production for the largest establishments in each industry.

**Remaining West Bank**

The West Bank excluding that part of Jerusalem that was annexed after the 1967 occupation by Israel.
