Notice for Users:

1. Due to COVID-19 pandemic and inability to conduct face-to-face interview, data for Consumer Price Index has been collected using mobile phones, in all of the Palestinian Governorates interview.
2. The number of outlets, from which Consumer Prices are collected in Palestine, reached 2,676 outlets in January 2021.

3. The percentage for the completion of data collection process is as follows:

Region	Number of Collected Outlets	Number of Non-Collected Outlets	Percentage of Collected Outlets
West Bank**	1,699	93	95%
Gaza Strip	699	10	99%
Jerusalem J1*	125	50	71%
Total	2,523	153	94%

4. All services outlets are excluded from collecting their data for January 2021, because of quarterly collection frequency.

5. The number of price observations collected to compile the Palestinian Consumer Price index is 38,395 price observations; where 97% was collected in January 2021. Hence, the percentages are distributed as follows within the Palestinian regions:

Region	Number of Actual Collected Observations	Estimated Number of Observations	Percentage of Actual Collected Observations
West Bank**	26,113	714	97%
Gaza Strip	9,309	48	99%
Jerusalem J1*	1,839	372	83%
Palestine	37,261	1,134	97%

6. International recommendations are followed in estimating the missing data, which are mentioned in the Consumer Price Index guide. Moreover, the **(Group Relative Method)** is one of the best methods used to estimate the missing data, which is the process of estimating the prices based on the change in the prices of the remaining sources for the same category. Accordingly, in case of the closure of an entire source on a temporary basis, all the prices of that source have been estimated based on the change in the prices of the sources that share the same items, which are collected from that source.

7. The estimate also used at the **(Next Level Up in Aggregation)** in case of the disappearance of the index for a whole sub-group or a higher group reaching up to the major groups that constitute the index.
