This was due to the increase of the transfers of donors to the government sector. The transfers to the government sector contributed with 30.1% of total transfers from abroad, while the transfers to other sectors was 69.9%. The donors' current transfers constituted 30.8% of total transfers from abroad.

It is worth mentioning that the Balance of Payments (BoP) is used to determine the economic position of a country compared to other countries worldwide, and to calculate the size of its external debt. This data enables researchers and decision makers to devise informed economic policies and development plans to improve their external balance to guarantee the stability of the state and sustain the economic growth. BoP data was prepared according to the latest international recommendations taking into account the specificity of the Palestinian situation.
