Preface

PCBS has sought, since it was established, to build a system of national official statistics based on the needs of the Palestinian society and in line with international recommendations as prerequisite for full membership in the international statistical community. PCBS has adopted the principle of progression within the Palestinian priorities of the current phase as basis for advancing towards completing the statistical system. PCBS has accomplished many statistical activities using primary sources including censuses, field surveys, as well as compiling statistics from secondary sources such as the administrative records, through cooperation with institutions in the public and private sectors.

We are pleased to present Tulkarm Governorate Statistical Yearbook (3) to provide continuous time series that allow reviewing the general directions in the different areas through a comprehensive statistical reference that covers most population, social, economic, and geographic areas.

This book is one of the most important and comprehensive official statistical references about Tulkarm governorate. It provides official statistics about the different areas of life in the governorate.

We hope that this publication would contribute in bridging the information gap to serve the development process, planning and decision making based on professional and scientific basis at the national and governorate level.

April, 2011

**Ola Awad
President of PCBS**

Note

Please note that the statistics presented in this book are derived from various primary and secondary sources, which are not fully consistent in the reference time, concepts or methodology. Therefore, it is recommended to take this note into consideration while using these statistics.
