## **Preface**

Since its inception, the PCBS has sought to build an official database of statistics based on local needs and in accordance with standards that guarantee full membership in the international statistical community. PCBS adopted a gradual approach to realizing current Palestinian priorities. It has been able to accomplish several statistical tasks by relying on primary sources, including censuses and surveys. In addition, it has cooperated with public and private sector institutions in using secondary sources, such as administrative records, to derive further statistical data.

We are pleased to present the Twelfth Statistical Yearbook of Palestine 2011. This report is part of our efforts to provide a continuous time series that make it possible to study general trends in different fields through a comprehensive statistical reference that covers most demographic, social, economic, and geographic fields.

This report provides official statistics on various aspects of life in the Palestinian Territory, along with available statistics on Palestinians all over the world. This Yearbook presents Palestinian demographic, social and economic status over three sections in the first chapter.

The first section in chapter one discusses the conditions of Palestinians in those parts of the Palestinian Territory that are still under military Israeli occupation. The chapter covers social, economic, medical, educational, and cultural conditions, in addition to other areas.

The second section in chapter one discusses the conditions of Palestinians in the Palestinian Territory occupied in 1948, who live under full Israeli administration and jurisdiction.

The third section in chapter one addresses the most prominent characteristics of Palestinians in the Diaspora, particularly in the host countries of Palestinian refugees: Jordan, Syria, and Lebanon.

The second chapter deals with the most important Concepts and Definitions used in this Yearbook.

We hope that this Yearbook will bridge informational gaps as well as providing one of the main basic references for Palestine official statistics. The information provided by this Yearbook should enhance development and assist decision makers in formulating decisions and plans based on informed and professional foundations.

**December, 2011**

**Ola Awad  
PCBS President**

## **Important Note**

**In the first chapter, statistical data were derived from PCBS publications. Readers can, if necessary, refer to these publications.**

**In the second and the third chapters of this Yearbook, the multiplicity and variety of sources, concepts and reference periods complicate the effort to present statistical data in a complete and consistent manner.**

**There are some minor differences between the value of some variables and their aggregates in tables as a result of rounding and calculations.**

**For greater detail for English readers about any topic in this Yearbook, please refer to the tables in the Arabic section, which are in both Arabic and English.**

**A set of special symbols were used in the tables of this book. The representations of these symbols are as follows:**

- (-) Nil**
