Domestic Violence Survey 2005

Preliminary Findings

23.3% of ever married women stated that they were Exposed at least for one time to physical violence action in the Palestinian Territory during 2005, while 61.7% they were Exposed at least for one time to psychological violence at during 2005.

In a recent one-of-a kind study in the Arab world, the Palestinian Central Bureau of Statistics is pleased to announce the findings of the Domestic Violence Survey conducted between December 18th, 2005 and January 18th, 2006 on a sample of 4,212 households, distributed as 2,772 in the West Bank and 1,440 in Gaza Strip.

The main objective of the survey is to provide comprehensive statistics on domestic violence in general and to diagnose the phenomenon of violence in the Palestinian society against the woman, spouse, children, and elderly in particular since such phenomenon is under registered and can not often be reported due to prevalent traditions, habits, and culture of the Palestinian society.

Ever-married women

Results showed that 23.3% of women stated that they were exposed to physical violence at least for one time during 2005, 61.7% to psychological violence and 10.5% to sexual violence in the Palestinian Territory. The percentage of women who were exposed to psychological violence in the West Bank is higher than of Gaza Strip (68.8 % and 49.7%) respectively. While Exposure to physical violence in the West Bank was 23.7% and 22.6% in Gaza Strip. Rural women suffer more from psychological violence (64.8%) compared to Urban and Refugee women (62.8% and 52.3%) respectively.

Results showed a drop in exposure to physical violence against women among high school diplomas and higher 19.1%, Compared to 25.8% of women with elementary and lower education.

Data showed that women outside the labor force were exposed to physical violence at 23.9% compared to 16.8% for women inside labor force.

Unmarried women (18 years and over)

Data showed that 24.6% of unmarried women aged 18 years and over were exposed to physical violence and 53.5% to psychological violence in the Palestinian Territory; in Gaza Strip they were less subjected to psychological violence compared with the West Bank (47.3% and 56.1%) respectively, while their exposure to physical violence in the West Bank and Gaza Strip was quite close results (24.4% and 25.1%) respectively. Nevertheless, data showed a rise in psychological violence in urban areas, followed by refugee camps and rural areas (56.5%, 54.6%, and 46.8%) respectively.

Children (5-17) Years

Data showed that 51.4 % of Mothers stated that one of their children aged (5-17) years was exposed to Violence during 2005, distributed by 53.3% in the West Bank and 48.5% in Gaza Strip. Data showed that Rural Children were the more exposed to violence at 56.4%, in Urban 50.1% and 47.3% in Refugee Camps. Data Showed that children were exposed to assault mainly at home at 93.3%, followed by school at 45.2%, and 41.1% exposed to assault at the street.

Data revealed that the household members were the main source of practicing assault against children at 93.3%, followed by boys and girls at street at 39.4%, then the teacher at 34.6%.

Elderly (65 years and over)

Data showed that 6.4% of the elderly reported that they were exposed to insulting and cursing, 2.0% reported suffering armed twisting, forceful pulling, or pushing by a household member. Moreover, 5.8% of them were made to feel undesired by a household member.

Concepts and Definitions

Domestic violence	<p>Violence is any act or intended act of a household member against another member for the purpose of causing psychological or physical harm or any other types of pain and abuse. The study discussed different types of psychological, physical, and sexual violence practiced by the household members against each other.</p> <p>It is worth mentioning that other sources use terms like abuse, assault, and aggression and other terms and concepts to describe different types of violence and harm-causing. The concepts may slightly differ; however, they mean the same with respect to causing harm, psychological, and physical assaults. The study uses the term <i>violence</i> to illustrate all types of assaults and harm-causing.</p>
Physical violence	<p>A behavior directed against the body. Physical violence is done through punching, hair-pulling, arm-twisting, pinching, slapping, kicking, strangling, scorching, pulling, dragging, killing, and beating. It is used to express physical power. The victim of physical violence is usually the weaker person.</p>
Psychological violence	<p>It is a type of violence reflected in a psychological behavior or bad treatment, disdain, and despise of people. It is done through the use of cursing and insults by the person who practiced violence., breaking things that belong to the person, shouting and yelling at, name-calling, mocking using demeaning names, forcing to do specific acts, throwing out of the house, locking up in the house, terrorization, continuous threatening, and forcing. Psychological violence is used to cause anxiety fear, psychological damage, degrading, making one feel negative, weaken physical and mental capacities, harming other people and destroy capabilities, shaking self-confidence, undermining self-respect,. Psychological violence destroys self-confidence, causes body harm, loss of self-confidence.</p>
Sexual violence	<p>An act of using various aggressive Actions for the purpose of sexual abuse and causing harm. It is a human rights violation. Sexual violence is done through sexual harassment, rape, husband's refusal to use contraceptives during sexual intercourse with his wife, using physical force to compel the wife to have sexual intercourse, threatening to use sharp tools and beating to force her to have sexual intercourse, and using violent and harmful means. The purpose of this type of violence is to abuse the victim and use force to control the victim who is usually the woman; it occurs because there aren't any strict rules taken against the perpetrators.</p>
