فخامة الرئيس محمود عباس "أبو مازن"

رئيس اللجنة التنفيذية لمنظمة التحرير الفلسطينية

رئيس السلطة الوطنية الفلسطينية

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

السلطة الوطنية الفلسطينية

منظمة التحرير الفلسطينية

بسم الله الرحمن الرحيم

تقديم من سيادة الرئيس محمود عباس "أبو مازن"
رئيس السلطة الوطنية الفلسطينية

يعتبر التعداد العام للسكان والمساكن والمنشآت ركناً أساسياً من أركان النظام الإحصائي الرسمي في أي دولة، حيث يأتي تنفيذه خلال عام 2007 استحقاقاً قانونياً وتنموياً ووطنياً وسيادياً، ويمثل تنفيذه لبنة أساسية في عملية بناء الدولة وإرساء أسس التخطيط السليم بمعايير علمية نظراً لما يوفره من إحصاءات دقيقة وتفصيلية لكافة نواحي الحياة، ويساهم في بناء الدولة الفلسطينية وإنجاز الاستقلال السياسي والاقتصادي والاجتماعي، وتحقيق التنمية.

لقد جاء تنفيذ هذا المشروع الوطني الكبير في ظل ظروف غاية في التعقيد على مختلف الأصعدة، مما جعل تنفيذ التعداد مهمة صعبة تعترضها الكثير من التحديات والأخطار، إلا أن عزيمة الشعب الفلسطيني وإصرار الفريق الوطني، واحتضان القيادة السياسية جعلت من التغلب على هذا التحدي أمراً ممكناً أدى إلى تنفيذ التعداد العام الثاني في الأراضي الفلسطينية بجودة عالية وفق المعايير الدولية، بأيد وبخبرات فلسطينية وقرار فلسطيني مستقل، واستجابة للحاجات الوطنية في شتى المجالات.

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

السلطة الوطنية الفلسطينية

منظمة التحرير الفلسطينية

لقد أسهم التعداد في إعادة الموضوع التنموي على الأجندة الوطنية والدولية في فلسطين، بعد أن تراجع دورها لصالح الأجندة الإغاثية، فالتنمية أهم الدعامات الضرورية لتأسيس مجتمع ديمقراطي، وبناء إنسان حر ملتزم بالبادئ الوطنية والإنسانية. والإحصاءات الدقيقة والعلمية هي العمود الفقري لوضع خطط تنموية مبنية على أسس سليمة تشكل رافعة لقضايا التنمية وتحقيق الأهداف المتعلقة عليها.

لقد أبدى المجتمع الدولي اهتماماً بالغاً بهذا المشروع التنموي وعبر عن اهتمامه من خلال الدعم المادي والفني الذي قدمته بعض الدول الصديقة والمنظمات الدولية. فقد كان لصندوق الأمم المتحدة للسكان مساهمة مادية وفنية جادة، وكذلك صندوق أوبك للتنمية الدولية، وحكومات النرويج وهولندا وسويسرا وأستراليا، والمملكة العربية السعودية ومنظمة الأمم المتحدة للطفولة "اليونيسيف".

إننا إذ نهدي هذا الإنجاز التاريخي الى كل فلسطيني، فإننا نعبر عن تقديرنا وشكرنا لأسرة الجهاز المركزي للإحصاء الفلسطيني والفريق الوطني للتعداد على إصرارهم وعطائهم وتفانيهم في تحقيق هذا الإنجاز.

رام الله: 2008/5/22

محمود عباس

رئيس اللجنة التنفيذية لمنظمة التحرير الفلسطينية

رئيس السلطة الوطنية الفلسطينية

Acknowledgments

The Population, Housing and Establishment Census (PHC-2007) is the second census conducted by the Palestinian Central Bureau of Statistics (PCBS) since the Palestinian National Authority (PNA) was established in 1994. The PHC-2007 was conducted in a very critical and complicated political, administrative, financial and organizational environment. It could not have been accomplished without the generous support of a number of friendly countries, international and national institutions and personalities.

The implementation of the PHC-2007 was co-financed by the PNA, United Nations Population Fund (UNFPA), the Core Funding Group (CFG) of PCBS (Norway, Netherlands, and Switzerland), OPEC Fund for International Development (OFID), Australia, and the United Nations Children's Fund (UNICEF).

PCBS would not have been able to implement the PHC-2007 as a national project in such complicated circumstances without the important contribution made by the PHC-2007 National Higher Committee, the committees in the governorates, publicity campaign committees, and many other official and popular supporting committees and bodies.

We would also like to highlight the outstanding efforts made by the Census National Director, Executive Director, and all census national team members to plan, manage, implement, supervise, monitor, and coordinate census activities: senior assistants of the national and executive director, census directors in the governorates and their assistants, coordinators of the publicity campaign and their assistants, field supervisors, field observers, enumerators, administrators and other team members.

PCBS extends its deep thanks to all of these personalities and institutions for the tremendous efforts they exerted to bring the second Palestinian census to light.

Preface

The PHC-2007 is an important pillar of the national development process. It is a primary prerequisite for the socioeconomic planning. Furthermore, it helps reinforcing the Palestinian sovereignty on the ground. Countries around the world usually conduct censuses every decade according to the degree of population stability, the amount of potential changes in the demographic characteristics and the availability of the financial resources.

Realizing the importance of bridging the gap between society's statistical needs the current situation in the Palestinian Territory conducted the first national population, housing and establishment Census in 1997. PHC-2007 has been conducted for legal, development and statistical considerations. Success is vehemently attributed to the colossal efforts exerted by the national census team and the continuous support of the Palestinian leadership.

The main objective of the PHC-2007 is to update statistical data on the Palestinian population, housing units, economic establishments and agricultural holdings, and to provide small area statistics to the planners and decision makers. PHC-2007 will contribute to realizing a balanced and comprehensive development in all sectors.

PHC-2007 was designed and implemented in accordance with the United Nations principles and recommendations of Population and housing census taking into consideration the local Palestinian needs. Special attention was given to affording complete and adequate data on the size, structure, distribution and characteristics of the demographic, economic and social components of the Palestinian population; the characteristics of housing units; the number and characteristics of the economic establishments and making an inventory of the agricultural holdings. Consequently, obtained statistical data will foster and support the role and efficiency of planning both on the national and local governments levels.

In an effort of PCBS to provide the users with the census results as soon as possible, the national census team made every possible effort to fulfill that, where we were able to publish the preliminary results of the census after five weeks of the end of the census fieldwork events and this is considered a record time compared to other countries. In addition the final results of buildings and establishments for Palestinian Territory were disseminated. In a continuation of this approach this report comes as a part of detailed reports about population at governorate level.

PCBS and the national census team are pleased to present this report which contains the census final results in the Palestinian Territory. Hoping to be a reference for all planners, decision makers and policy makers in the public and private sectors and civil society institutions.

March, 2012

**Ola Awad
President of PCBS**

Important Notes

Based on The contained data in this report is based on the following facts:-

1. Population and socio-economic data are based on the actually enumerated population and doesn't include uncouned population estimates according to the post enumeration survey.
2. Because of the special situation in the Jerusalem governorate, especially the J1 area, a reduced questionnaire has been designed especially for the household and housing conditions for the Jerusalem J1 which contains only the following questions:
 - Number of nuclear families, type of housing and number of rooms.
 - Household roster (relationship to the head, sex, religion, age, refugee status, educational level, marital status).
3. In some tables the total of percentages might not add up to 100% due to rounding.
4. A set of special symbols were used in the tables of this report. The representation of these symbols are:
 - (-) Nil.
 - (0) less than 0.05%.

Chapter One

Introduction

1.1 Introduction

The Population Housing and Establishments Census-2007 (PHC-2007) is the second census conducted in the Palestinian Territory. It is the largest and the most inclusive statistical operation conducted to obtain statistical data necessary for socio-economic planning and monitoring. Given the great importance of this census, the Council of Ministers issued specific decisions at its meeting convened in Ramallah on 16/12/2006 regarding the implementation of the Population, Housing and Establishment Census-2007. These decisions set the geographical scope of the census and established the national committees assigned to supervise the implementation.

The census is one of the pillars of the official statistical system. All sectors of society and private and governmental institutions were requested to support the national team which has the responsibility for planning and conducting the census activities.

1.2 Objectives

The main objective of the PHC-2007 is to provide figures of the Palestinian population and its geographical distribution in accordance with a number of relatively stable basic characteristics for the purposes of socio-economic development. Preparations for conducting a census usually take three to five years for piloting, testing tools, work plans, human and physical needs and timetable. The census is one of the most important statistical activities as it provides statistical data on the distribution of population and the demographic, social and economic characteristics in a certain reference period of time for all the individuals within the borders of the state.

1.3 Justifications for Conducting the Census

Nationally, there is a consensus on the necessity of conducting a regular census each decade. A census is considered a legal requirement according to the General Statistics Law No. 4, 2000. In particular, the census was conducted for the following justifications:

1. Comparing statistics from both the 2007 and 1997 censuses for various statistical indicators and tracking fundamental changes in population, fertility, immigration, labor force and housing conditions.
2. Measuring the impact of the Expansion and Annexation Wall on population displacement, especially in the localities through which the Wall passes or totally segregates residents.
3. Providing small areas statistics, which are essential for the planning process at micro-level.
4. Realizing the millennium goals. These would not have been achieved without a variety of indicators on development and trends of change in the population, social and economic fields, particularly indicators in education, employment, demography, and the population age structure.
5. Updating population projections: The availability of statistical data on the population from two censuses is one of the most important requirements for success in preparing accurate population projections for the coming years, in addition to the updating of population and establishments registers.

6. Updating households, buildings, houses and establishments sampling frames, which are essential for implementing sample-based surveys.
7. Strengthening national statistical capacities and enforcing them as a form of national sovereignty over land and population.

1.4 History of Censuses in Palestine

1. The first population census in Palestine was conducted in October 1922 during the British Mandate era. The estimated population was 752 thousand.
2. A second population census was conducted in November 1931. The population was estimated at 1.033 million.
3. A demographic survey was conducted in 1944. The estimated number of the population of Palestine was estimated at 1.74 million.
4. Under the Hashemite Kingdom of Jordan's administration of the West Bank, the Palestinian population in the West Bank was estimated at 667 thousand in the 1952 census and 805 thousand in the 1962 census.
5. Under the Israeli occupation, a comprehensive enumeration of the Palestinian population was done in September 1967. About 599 thousand inhabitants were enumerated in the West Bank and approximately 400 thousand in the Gaza Strip. It should be noted that about 400 thousand Palestinians were displaced from the Palestinian Territory immediately after the Israeli occupation in 1967.
6. PCBS conducted the first Palestinian census in 1997. The estimated population in the West Bank (West Bank excluding J1, i.e., the part of Jerusalem annexed by Israel in 1967) and Gaza Strip was 2.6 million. The estimated population of J1 at the time was about 210 thousand. The Israeli authorities prevented the national census team from surveying the J1 population.

1.5 Stages of Census Implementation

The Population, Housing and Establishment Census-2007 was undertaken in three stages:

1.5.1 The Preparatory Stage

This stage began at the beginning of 2005 and finished in July 2007. The preparatory stage was a preliminary stage during which formal decisions on the census were announced. Different organizational structures and committees were formed during this phase. In order to meet expected governmental needs, PCBS cooperated with ministries and governmental departments to prepare a list of different variables and indicators.

Maps were prepared for localities and these localities were divided into enumeration areas. Questionnaire design, modules, and different plans were developed in this phase.

1.5.2 The Field Work Stage

This stage began in August 2007 and was completed by the end of 2007. It included delineation of enumeration areas, marking and listing of buildings, housing units and establishments from 30/10/1997 - 23/11/1997, and the population count from 1-16/12/2008.

1.5.3 Data Processing Stage

This stage began in November 2007 to the end of 2008 in the West Bank. The main activities of the census data processing stage were office editing, office coding, data entry and computer editing. In the Gaza Strip, these operations took around eight months during the period March – October 2011 due to the closure of the Palestinian Central Bureau of Statistics office in Gaza that prevented work on data processing stage.

1.6 Dissemination Stages

1.6.1 Preliminary Findings

The preliminary findings of the Population, Housing and Establishments Census - 2007 were disseminated on 7/2/2008 in the form of numbers at governorate and regional level (the West Bank and Gaza Strip) and the Palestinian Territory. These results were preliminary since they were compiled manually depending on the organization books of the census observers. The results were disseminated in record time a month after finishing the fieldwork operations.

1.6.2 Final Findings

After completing the data processing stage in Gaza Strip, including editing, coding and data entry of all questionnaires for each enumeration area, the final detailed results for the Palestinian Territory were disseminated in the report, including all the characteristics of individuals and households and the final results of Gaza Strip and its governorates, all these expected to be disseminated during January 2012 - March 2012. The detailed results of the West Bank and its governorates were disseminated during November 2008 - July 2009.

1.6.3 Analytical Reports

The analytical reports regarding population and social themes will be disseminated via the dissemination project, which will be carried out by experts from universities and research centers.

Chapter Two

Concepts and Definitions

The definitions used in the PHC-2007 are based on the de-facto concept as the United Nations standard concepts and definitions stated in order to be consistent with the 1997 census and to ensure comparability. The following concepts and definitions were used in this report

Population Census:

The process of collection, classification, processing, analysis, assessment, dissemination of statistical data on the number of population and their distribution by basic demographic and socio-economic characteristics in a specific reference period within the boundaries of a specific geographic area.

Geographical, Administrative and Statistical Divisions

According to current administrative divisions, the Palestinian Territory is divided into two geographic regions: West Bank and Gaza Strip.

1. **West Bank** is divided into 11 Governorates (Jenin, Tubas, Tulkarm, Nablus, Qalqiliya, Salfit, Ramallah & Al-Bireh, Jericho & AlAghwar, Jerusalem, Bethlehem, and Hebron).
2. **Gaza Strip** is divided into 5 Governorates (North Gaza, Gaza, Deir Al-Balah, Khan Yunis, Rafah).

Locality:

A permanently inhabited place, which has an independent municipal administration or a permanently inhabited, separated place not included within the formal boundaries of another locality.

Locality Type:

Localities have been divided into three types: **Urban, Rural, Camps**

Urban: Any locality whose population amounts to 10,000 persons or more. This applies to all governorates/districts centers regardless of their size. Besides, it refers to all localities whose populations vary from 4,000 to 9,999 persons provided they have, at least, four of the following elements: public electricity network, public water network, post office, health center with a full – time physician and a school offering a general secondary education certificate.

Rural: Any locality whose population is less than 4,000 persons or whose population varies from 4,000 to 9,999 persons but lacking four of the aforementioned elements.

Camp: It refers to any locality referred to as a refugee camp and administered by the United Nations Refugees and Work Agency in the Near East (U.N.R.W.A.).

Building:

A building is defined as any fixed construction that is temporarily or permanently erected on the surface of the earth or water. A building is surrounded by four walls or with at least one completed ceiling at the time of the visit, regardless of the construction material and the purpose of construction and utilization at the time of the Census. The building might be utilized for habitation, for work, for both, vacant, closed, deserted, under preparation or under construction at the time of the Census.

House:

A building or part of a building constructed for one household only, with one or more independent entrance leading to the public road without passing through another house.

Collective Households:

It refers to the place constructed for the residence of a group of individuals, who live therein and benefit from the services it provides. The collective household; it may be comprised of one building or more or one housing unit or more. Examples of collective households include hotels, hostels, elderly and orphans homes, psycho-therapy clinics and hospitals, collective households for university students, collective living quarters (camps) at the passages, and housing units of priests and nuns in the monasteries and churches (who do not have other households).

Household:

One person or a group of persons with or without a household relationship, who live in the same housing unit, share meals and make joint provision of food and other essentials of living. In PHC-2007, the household includes:

3. Household members found in the housing unit on the night of 01/12/2007.
4. Visitors living outside the Palestinian Territory but who spent the night of 01/12/2007 in the housing unit of the household (relatives and non-relatives).
5. Visitors from the Palestinian Territory who, as a whole household, remained for all of the enumeration period 1-16/12/2007.
6. Servants and other workers living usually within the household who spent the night of 01/12/2007 with the household.
7. New births born prior to the night of 01/12/2007 and still alive, irrespective of whether they were within the household or in the hospital.
8. Household members who spent the night of 01/12/2007 with the household and died after that night.
9. Household members who usually live in the housing unit but were not available in the night of 01/12/2007. This category includes:
 - Household members who spent the night of 01/12/2007 with another household inside the Palestinian Territory.
 - Household members working at night 01/12/2007 in factories, hospitals, airports, etc.
 - Individuals who spent the night of 01/12/2007 traveling in the public ways inside the Palestinian Territory.
 - Fishermen who spent the night fishing in the regional waters.
 - Members of internal security forces, and civil defense forces irrespective of where they spent the night of 01/12/2007.
 - Palestinian household members living usually within the household and who are holding an ID card, but who were abroad less than one year for temporary reasons (tourist, visit, pilgrim or any other reason).
 - Palestinian household members living usually within the household but who were absent during the night of 01/12/2007 due to urgent causes including hospital, detainee, etc.
 - Palestinian household members living usually within the households but who were absent during the night of 01/12/2007 due to their stay in a hotel in the Palestinian Territory.
 - Students studying abroad regardless of the length of their stay.

- Students studying in Palestinian universities, institutes and other educational institutions irrespective of place of existence.
- Household members detained in Israeli prisons.

The following were excluded from households:

- Persons who died before the night of 01/12/2007.
- Persons who were born after the night of 01/12/2007.
- Persons who stayed during the counting in elderly homes, orphans homes, psychotherapy clinics and hospitals, and other collective households in the Palestinian Territory.

Type of households that underwent enumeration are divided into:

Private Households: The households included in the aforementioned definition of the household.

Collective (Institutional Households): It refers to the households enumerated in the previously mentioned collective households.

Palestinian Household:

It refers to the private household whose head holds the Palestinian nationality. As for non Palestinian household, it refers to the household whose head holds non Palestinian nationality irrespective of the nationality of other household members.

Special types of Households:

A one-person-household: It refers to the household comprised of one individual.

Nuclear household: It refers to the living household comprised of a couple only; a couple and a son or a daughter (not adopted son or daughter) or more; or a male head of a household with a son or a daughter or more; or a female head of a household with a son or a daughter or more. It is worthy to note that no other relatives or non-relatives live with this household.

Extended Household: A household of at least one nuclear household together with other relatives.

Composite Household: Refers to household consisting of at least one nuclear household with other non-relatives.

Average Household Size:

It refers to the average number of household members calculated through dividing the total number of members for a certain category by the number of households for that particular category.

Head of the household:

It refers to the person who usually lives within the household and is considered as the head of the household by its other members. Often, he \ she is the main decision-maker and responsible for financial support and economic welfare of the household.

Relationship to the head of the household:

It refers to the type of relationship to the head of the household and is normally classified as follows:

Head of the household, Spouse, Son/ daughter, Father / mother, Brother / sister, Grandfather/ grandmother, Grand-child, Son/ daughter in law, Other relatives, Others.

Sex:

It is divided into male and female.

Date of Birth:

It refers to the date in which the person was born. It is normally comprised of three cells: day, month and year according to the official identification documents such as the birth certificate, passport, ...etc.

Age in Completed Years:

The completed age in years of the person enumerated, which is the difference between the date of birth and the survey reference period.

Original Nationality:

It refers to the political identity of the individuals, as Palestinian, Jordanian, Egyptian, Brazilian, French, etc.

Religion:

It refers to the spiritual belief of the person, which is divided into Muslim, Christian, Other.

Mother's usual place of residence (place of birth):

It refers to the usual place of residence of the mother when the person was born.

Usual place of residence:

It refers to the name of the locality in which the person spends most of his time during the year (lived there six months and above), irrespective of whether it is the person's same place of existence during the Census, or the place in which he works and performs related activities or the place in which his original household is based or not.

Refugee Status:

This status relates to the Palestinians who were forced to leave their land in the Palestinian Territory occupied by Israel in 1948. It applies to their male sons and grandchildren.

1. **Registered Refugees:** It applies to registered refugees holding refugee registration cards issued by UNRWA.
2. **Non-Registered Refugees:** It applies to unregistered refugees who do not hold refugee registration cards issued by UNRWA.
3. **Non-Refugee:** It applies to any Palestinian not categorized under any of the two aforementioned statuses.

Handicapped and Disabled:

The disabled is defined as the person suffering from a clear and evident weakness in performing certain activities due to continuous difficulties emanating from a physical, mental or health state that lasted for more than six months.

Seeing (Visual) Disability:

It includes blind and one-eyed persons, and any person suffering from vision weakness even after using special devices, provided they do not suffer from any other disability.

Hearing (Auditory) Disability:

It includes deaf persons and any person suffering from clear auditory problems even after using special auditory devices, provided they do not suffer from any other disability.

Moving Disability:

It refers to the person suffering from evident problems in walking, climbing stairs, bending, bowing, kneeling, provided he / she does not suffer from any other disability.

Cognition Disability:

It refers to the individuals who suffer from difficulties in concentration and memory, decision-making, understanding speech, reading, identifying persons, identifying areas and the use of the map, calculations, reading and thinking.

Communication Disability:

Refers to people who do not have the ability to exchange information and ideas with others and to deal with them through the use of speech, or sign or movement or to write the information they want to share with others, which may be the result of the inability of hearing or speech, or lack of the mental capacity to understand or interpret what others say, whether signals, words or movements.

Causes of Disability/ Difficulty:

The cause of disability/difficulty is the main reason that caused the healthy person to be disabled:

1. **Congenital:** It applies if the disability/difficulty emanates from hereditary or inbred causes.
2. **During delivery:** It applies if the disability/difficulty emanates from causes related to the birth delivery.
3. **Disease:** It applies if the disability/ disability/difficulty originates from a certain disease, such as polio.
4. **Psychological/ physical abuse:** means that person with disability/difficulty resulted from Physical or psychological abuse from one of his family, teacher in the school, unknown person, or unknown site.
5. **Aging:** means that person with disability/difficulty caused by aging, this case apply only to elderly person.
6. **Work Injury:** It applies if the disability/difficulty results from a work injury that took place while performing work.
7. **Traffic accident:** It applies when the disability/difficulty results from car accidents, including all types of accidents.
8. **Other accident:** It applies when the disability/difficulty results from any other type of accidents, e.g. falling from high places, fire, fire shooting, ...etc. (It should be noted that such a disability is considered a work injury if it took place during work).
9. **Israeli measurements:** means that person with disability/difficulty resulted from any kind of attack from Israeli soldiers and Settlers including shooting or other measures during the Intifada (except war).
10. **War:** means that person with disability/difficulty resulted from war, but not including first or second Intifada.
11. **Others:** It applies if the cause of disability/difficulty is not any of the aforementioned reasons.

Educational Attendance:

Attendance means registering the person in any formal education stage irrespective of whether it took the form of continuous attendance or distance learning. Formal education stages include the elementary stage, preparatory stage, (both of which are referred to as the basic stage), secondary stage, and higher education stage (universities, colleges, vocational institutes, etc.).

Enrollment categories are as follows:

1. **Attending:** It applies if the person is currently enrolled in a regular education stage.
2. **Attended and left:** It applies if the person unsuccessfully left a regular education stage, i.e., without obtaining any degree.
3. **Attended and graduated:** It applies if the person successfully graduated from a regular education stage and did not enroll in any stage after that.
4. **Never attended:** It applies if the person is not currently enrolled and was never enrolled in any regular education stage.

Educational Attainment: It refers to the highest successfully completed educational attainment level. The educational level for persons aged 10 years and over .

Illiterate: It applies to persons unable to read or write in any language and who were never awarded a certificate from any formal education system.

Can Read and Write: It applies to persons who are able to read and write without completing any of the educational stages. Such persons are generally able to read and write simple sentences.

Qualification (The highest successfully completed educational attainment):

It refers to the highest educational attainment level (elementary and higher) the person successfully completed. **Elementary** is the educational level for persons who successfully completed the sixth elementary grade. Those who successfully completed the ninth grade shall be classified under the **preparatory** level. Likewise, persons who successfully completed the general secondary certificate examination shall be classified under the **secondary** level. As for the rest of levels, they are as follows: **Associate diploma, bachelor degree (BA/BS), higher diploma, masters degree (MA/MS), doctorate (Ph.D)**

Specialization:

It refers to the name of the subject the person successfully completed.

Employed:

Persons who were at work at least one hour during the reference period, whether for their own account or for others paid or unpaid, or in the interest of the household. Employees classified according to the number of weekly working hours of the workers (1-14) hours, workers (15-34) hours, workers 35 hours or more.

Place of work:

It refers to the working place of the employed person and the last working place of the unemployed ever worked person. Place of work is classified as follows:

1. **At home:** It applies if the employee works inside his housing unit. However, it does not apply to cases in which a grocery with its own door (for instance) is close to the housing unit. In this case, the place of work is considered in the same locality.
2. **In the same locality:** It applies if the employee works inside his locality.
3. **In the same governorate:** It applies if the employee works in one of the localities belonging to the same governorate.
4. **In other governorate:** It applies if the employee works in one of the localities belonging to a different governorate.
5. **In Israel:** It applies if the employee works in the Palestinian Territory occupied by Israel in 1948.
6. **In Settlements:** It applies if the employee works in one of the Israeli settlements established in parts of the Palestinian Territory occupied in 1967.
7. **Abroad:** It applies if the employee works in another country outside the Palestinian Territory.

Marital Status:

The status of those 12 years old and over in terms of marriage traditions and laws in the country.

May be one of the following cases:

1. **Never married:** It applies if the person aged 12 years and over has not been married or legally engaged (according to customs and traditions applicable in the country).
2. **Legally engaged:** It applies if the person aged 12 years and over has an official marriage document (issued by a competent court) but has not been actually married yet according to customs and traditions applicable in the country. The divorced, widowed, and married twice do not belong to this category.
3. **Married:** It applies if the person aged 12 years and over is actually and officially married (according to customs and traditions applicable in the country) irrespective of

his / her past marital status as well as of whether the couple were together during the reference period or not. The person married to more than one wife is classified as married.

4. **Divorced:** The person aged 12 years and over who previously married and legally divorced but was not married again.
5. **Widowed:** The married person aged 12 years and over whose marriage was ended by the death of the spouse and was not married again.
6. **Separated:** The individual 12 years old and over who was married, but his/her marriage was revoked for some reason without any legal or official registration, and he/she did not marry again.

Age at first marriage in completed years:

refers to the age of the person in the actual marriage date.

Live Birth: It refers to any live birth who shouted, cried or shown any signs of live upon delivery, irrespective of whether he died after that or not.

Living Children: Infants born alive and are still living regardless of age

Definitions of Jerusalem J1&J2

Given the geographical and political situations in the Jerusalem governorate, it has been divided into two parts (J1, and J2).

For mere statistical purposes, the Jerusalem Governorate was divided into two parts.

The first part (J1) includes that part of Jerusalem, which was annexed forcefully by Israel following its occupation of the West Bank in 1967. This part includes the following localities: (Beit Hanina, Shu'fat Refugees Camp, Shu'fat, Al' Isawiya, Jerusalem "Al - Quds" (Sheikh Jarrah, Wadi Al - Joz, Bab Al-Sahira, As Suwwana, At -Tur, , Ash - Shayyah, Ras Al-Amud), Silwan, Ath – Thuri, Jabal Al – Mukabbir, As – Sawahira Al – Gharbiya, Beit Safafa, Sharafat, Sur Bahir, and Um Tuba and Kufr A'qab).

The second part Jerusalem (J2) Includes Jerusalem governorate except that part of Jerusalem which was forcefully Annexed by Israel following its occupation of the West Bank in 1967. This part includes the following localities: Rafat, Mikhmas, Qalandya Refugees Camp, the Bedouin Community - Jaba', Qalandya, Beit Duqqu, Jaba', Al – Judeira, Beit Anan, Al-Ram, Dahiat Al-Pareed, Al Al – Jib, Bir Nabala, Beit Ijza, Al – Qubeiba, Khirbet Um Al – Lahem, Biddu, An – Nabi Samu'eil, Hezma, Beit Hanina Al Balad, Qatanna, Beit Surik, Beit Iksha, A'nata, Al Ka'abina (the Bedouin Community – Al – Khan Al – Ahmar), Arab al Jahalin (the Bedouin Communities, Al – Eizariya and Abu Deis), Az Za'eem, Al – Sawahreh Al – Sharqiyeh and Ash – Sheikh Sa'd.

Chapter Three

Methodology

3.1 Census Coverage

The PHC-2007 covered all individuals who were in the Palestinian Territory on the census reference night (30/11-1/12/2007) regardless of nationality and citizenship. It also covered all Palestinians who usually have residence in the Palestinian Territory (including those who were temporarily absent for less than one year for the purpose of visit, tourism, treatment, etc. while their households are still living at their permanent places of residence in the Palestinian Territory). All Palestinian students abroad while their households are still living at their permanent places of residence were also included, in addition to all prisoners and detainees in Israeli jails, regardless of the duration of detention. The census excluded all Palestinians holding identity cards who were absent for more than one year (except for students), even if their households are still living in their places of residence in the Palestinian Territory.

This was a decision made by the Census National Committee in its first meeting in the following resolution:

1. **Determine the coverage of the census to include the entire population, housing and establishments in the Occupied Palestinian Territory in 1967, with the exception of Israeli settlements.**
2. **The enumeration includes the following categories of individuals:**
 - A. All individuals living in the Palestinian Territory on the census reference date regardless of nationality, citizenship and reason of presence, and regardless of where present in the Palestinian Territory.
 - B. All Palestinians who live abroad temporarily and for less than a year whose normal place of residence is in the Palestinian Territory are to be counted with their households.
 - C. All Palestinians who are studying abroad, regardless of the duration of the study and length of residence abroad, and all individuals detained in Israeli jails regardless of the period of detention, are to be counted with their households.

3.2 Special Questionnaire of Jerusalem Governorate

Due to the special situation in the governorate of Jerusalem, particularly the J1 area, a questionnaire was designed especially for household and housing conditions for this area containing the following questions:

1. Number of nuclear households, type of housing unit and number of rooms.
2. Booklet on household members, booklet including the relationship of the head of the household, sex, religion, age, refugee status, educational level and marital status.

3.3 Questionnaires and Forms

Three questionnaires were designed for data collection comprising listing of buildings, housing and households questionnaire, the household and housing conditions questionnaire and economic establishments questionnaire. An additional questionnaire was allocated for hotels. The following is a detailed account of the items and variables of these questionnaires:

Buildings, Housing and Households Listing Questionnaire

The questionnaire of buildings, housing and households contains, in addition to the identification data, a number of items and detailed variables including:

The owner's name or the name of the building, the type of building, current use of the building, type of owner, the year of establishment, construction material for external walls, the number of floors in the building, the number of housing units in the building, current use of the housing unit, and the reason for the closure, absence, desertion of closed units, or abandonment.

Households and Housing Conditions Questionnaire

The questionnaire of households and housing conditions, in addition to the identification data, has the following items and variables:

Section I: Housing Data and Conditions

Housing data includes occupation type, housing type, number of rooms, number of nuclear households, housing property, number of bedrooms, connectivity of public water, electricity and sanitation, availability of a kitchen, bathroom and toilet, the method used for the disposal of household wastes, the main source of energy used in cooking and heating, availability of durable goods to the household, available information technology for the household.

Section II: Individual Data

- A. Data of all individuals regardless of their age, sex and nationality and comprising the name, the head of the household, sex, date of birth, age in completed years, original nationality, religion, usual place of residence of the individual's mother when giving birth, usual place of residence, duration of residence in the usual place of residence, previous place of residence, and reason for changing previous place of residence.
- B. Data of Palestinian individuals comprising identification number, refugee status, and difficulties or disabilities that might cause suffering to individuals where present and availability of insurance.
- C. Data of all individuals aged five years and over, namely education, number of study years successfully completed in the formal educational system, computer use.
- D. Data of all individuals aged seven years and over, namely relation to labor status, main occupation, economic activity, sector activity status and place of work.
- E. Data of all individuals 10 years and over, namely educational level, specialization, place where obtained higher education and vocational training obtained by the individuals.
- F. Data of all individuals aged 12 years and over, namely marital status, age at first marriage, duration of marriage, the number of live births and the number of living children, males and females, throughout the duration of marriage for women, and the number of live births and children still living during the previous year.

Section III: Household Members

Summary of the number of household members divided into males and females.

Section IV: Tourism and Kindergartens

Tourism inside and outside Palestine; children enrolled in kindergartens by sex.

Section V: Agricultural Holdings

Includes the individual holder in the questionnaire and the number of agricultural holdings by type (plant, animal, and mixed).

Section VI: Mortality

Includes questions about deaths in the household during the 12 months preceding the census, the name of the deceased and their relationship to the head of the household, sex and age at death and whether death was during pregnancy or childbirth.

3.4 Fieldwork

The fieldwork stage of implementing the Population, Housing and Establishments Census-2007 includes several consecutive fieldwork operations which are:

3.4.1 Updating Maps

PCBS conducted a comprehensive updating of maps for all Palestinian localities in early November 2006, which was completed at the end of June 2007. All localities were visited and their maps, which had been prepared by the Census National Committee for defining and enumerating the localities, were updated.

Following completion of amendments to the maps, localities were divided into enumeration areas; each one includes about 150 housing units, with the exception of small localities that include less than 150 housing units and where each locality was considered to be an enumeration area regardless of the number of housing units. Census fieldwork teams, supervisors, observers and enumerators were allocated a specific area of work on maps to avoid overlapping or undercounting of enumeration areas. Copies of the maps were photocopied for field work teams and the central operations room. The number of enumeration areas totaled 4,916.

3.4.2 Identification and Delineation of Enumeration Areas

Supervisors put signs on the walls of buildings located on the outer borders of enumeration areas of the 4,916 areas distributed in localities in the West Bank and Gaza Strip, except J1. The implementation of this process took 25 days from 18/08/2007 to 11/09/2007.

3.4.3 Numbering and Counting of Buildings, Housing and Households and Establishments

The observers and their assistants carried out this process in all localities during the period from 20/10/2007 to 10/11/2007 by checking all buildings and putting the census number on the entries, as well as numbering all housing units in each building and collecting the main data of the buildings and housing units.

The main objective of this operation was to provide a range of important data on the numbers and characteristics of the buildings for use in policymaking concerning housing. This process also aimed to facilitate the work of enumerators in the implementation stage of counting the population. The observers during these operations gave each household a reminder questionnaire to be filled in on the morning of 01/12/2007 regarding the people who spent the reference night of 30/11- 01/12/2007 in the housing for submission to the enumerator to assist in the process of counting the population and ensure accuracy and coverage.

3.4.4 Population Count

This process was implemented in the West Bank during the period from 01/12/2007 to 16/12/2007, while in the Gaza Strip it was implemented during the period from 25/12/2007 to 08/01/2008. Enumerators visited all the households in their homes and obtained data on the housing in which they live and their different characteristics, as well as data on household

members, and registered the demographic, social and economic characteristics of each household member.

3.4.5 Receipt of Booklets

The process of receiving booklets started after each enumerator had covered his/her enumeration area, which ended in the West Bank on the evening of 16/12/2007 and in the Gaza Strip on the evening of 08/01/2008. The process of receiving booklets was divided into two parts: fieldwork receipt, and then delivery to the census directorate in PCBS premises.

Receipt of Fieldwork Booklets

After completion of the counting phase, the observers received all booklets and questionnaires from the enumerators, namely the household and housing conditions booklets and the enumerator organizational book. After receiving them, the observers submitted them to their supervisors for a technical check. The receiving process began in the West Bank from 16/12/2007 until 25/12/2007 (during which the holiday of Eid Al-Adha took place), while in the Gaza Strip it started from 08/01/2008 until 12/01/2008. All booklets were handed over to PCBS main premises in Ramallah and Gaza.

Receipt of Booklets in PCBS Main Premises

The receipt process started in the main premises in Ramallah from all governorates on 29/12/2007 and ended on 07/01/2008 in the West Bank, while it started on 24/01/2008 and ended on 26/01/2008 in the Gaza Strip.

3.4.6 Post Enumeration Survey

Post enumeration is considered to be a developed technique for assessing and evaluating census findings. It was implemented through selecting a random sample of 218 enumeration areas representing all types of localities. The purpose of conducting such a study was to measure the rate of coverage and individuals in the Census-2007 to take these rates into account when preparing estimates of the population in the years after the census.

The fieldwork was implemented during the period from 29/12/2007- 03/01/2008 and 12/01/2008-16/01/2008 in the Gaza Strip. The process of editing the selected booklets for this survey was begun, matching them with the booklets of household and housing conditions obtained during the process of counting the population, i.e., data entry, data processing and extracting findings. These processes ended on 30/01/2008.

3.4.7 Preparation of the Preliminary Results

After completion of the counting process on 16/12/2007, the enumerators and observers carried out a desk review and prepared the preliminary fieldwork results from 16/12/2007 until 18/12/2007. After that, during the period from 24/12/2007 to 30/12/2007, preliminary results were compiled and reviewed by census managers in the governorates and then sent to the census office in PCBS main premises. This operation was carried out in Gaza Strip during the period from 08/01/2008 to 15/01/2008.

After receipt of the preliminary results forms from the fieldwork by the end of December 2007, these data were entered into computers to extract preliminary statistical tables for the Palestinian Territory and governorates. These tables contain the number of households and the number of male and female individuals.

During the receipt of preliminary results, coverage was thoroughly checked in all enumeration areas for comparison with the main enumeration areas booklet to ensure that no enumeration area had been missed.

3.4.8 Data Processing

The data processing stage includes all the stages after fieldwork, such as editing, coding, data entry, electronic editing and dissemination via both traditional methods (publications) and online or on CDs and databases. Data processing was carried out in the West Bank with two work shifts. This process started on 13/01/2008 by training editors and coders. Around 120 employees were hired for each shift, in addition to supervisors for each shift. In the Gaza Strip, data processing was carried out during March – October 2011.

3.4.9 Preparation of Final Findings

During this stage, certain basic steps were achieved, of which the most important were data processing, tabulation and dissemination.

Chapter Four

Summary of Final Results

4.1 Population findings

Findings show that the total number of the Palestinian Territory population on the eve of December 1, 2007 was 3,767,549 people, including 1,911,886 males and 1,855,663 females. The male/female sex ratio totaled 103.0 males per 100 females. The number of the population includes the following:

4.1.1 The actual counted population

According to the findings of the actual count process, the number of the actually counted population in the Palestinian Territory is 3,669,244 people. This constitutes 97.3% of the total population as per the results of the post enumeration survey.

The number of the Palestinian Territory population is divided by type of locality where 2,698,329 or 73.5% of the total Palestinian Territory population live in urban areas, 629,205 or 17.1% of the total Palestinian Territory population live in rural areas, and 341,710 or 9.3% of the total Palestinian Territory population live in refugee camps. Comparatively, in the 1997 census, the figures for rural and urban areas were close at 53.1% for urban areas of the total of the Palestinian Territory population and 31.0% for rural areas of the total of the Palestinian Territory population. The percentage of refugee camps was 15.9% of the total of the Palestinian Territory population.

4.1.2 The population number according to the post enumeration survey

The aim of conducting post enumeration survey is to measure the coverage rates of individuals in the Census in order to consider such rates when the population number is projected in the years following the Census. The post enumeration survey shows that the number of the Palestinian Territory population is 3,767,549 based on the findings of the post enumeration survey. Moreover, the post enumeration survey shows that the under coverage rate is 2.7%.

4.2 The basic demographic and social characteristics of the population

4.2.1 Population age structure

The Palestinian society of the Palestinian Territory is still a society of young people, according to the findings. The number of the people aged 0-14 years in the Palestinian Territory totals 1,538,448 or 41.9% of the total Palestinian Territory population. The number of people aged 15-64 is 1,959,205 or 53.4% of the total number of the Palestinian Territory population. The number of the rest of the population whose age is 65 years and over totals 111,076 of the Palestinian Territory population or 3.0% of the total Palestinian Territory population. 1.6% of the Palestinian Territory population had their ages unstated.

4.2.2 Basic Characteristics of Marriage

The findings show that the number of Palestinian people aged 12 and over who are married in the Palestinian Territory is 1,215,585 or 51.3% of the total Palestinian population of the Palestinian Territory who are in the age group of 12 years and over. The number of married males is 599,404 or 50.1% from total males population, and the number of married females is 616,181 or 52.6% from total females population. The number of divorced people in the

Palestinian Territory is 15,476 or 0.7% of the total population in the age group of 12 and over in the Palestinian Territory.

4.2.3 Refugee status

The number of refugees in the Palestinian Territory totaled 1,537,068 or 42.0% of the total Palestinian population of the Palestinian Territory. They are distributed as follows: 1,043,370 in urban areas (38.8% of the total Palestinian population of the urban areas), 162,250 in rural areas (25.8% of the total Palestinian population of the rural areas), and 331,448 in refugee camps (97.3% of the total Palestinian population of the refugee camps).

4.2.4 Basic Characteristics of Education

The number of people aged 5 years and over Palestinian Territory¹ attending education is 1,273,962 or 44.4% of the total population of the Palestinian Territory¹ of the same age group. They are distributed as follows: 644,274 males or 44.3% of the total Palestinian males aged 5 years and over, 629,688 females or 44.4% of the total Palestinian females aged 5 years and over.

According to findings, there are 135,944 illiterates in the Palestinian Territory in the age group of 15 years and over (they constitute 6.6% of the total of the Palestinian population of the same age group in the Palestinian Territory. Illiteracy is more prevalent among females than males since there were 34,019 illiterate males or 3.3% of the total number of illiterate Palestinian Territory population aged 15 years and over and 101,925 illiterate females or 9.9% of the total number of illiterate Palestinian Territory population of the same age group. The highest concentration of illiteracy was at rural areas 9.1% followed by refugee camps 6.9% and urban areas 5.9%.

In comparison with the 1997 Census, illiteracy has dropped. The rate of the Palestinian illiterate people reached approximately 13.9% of the total Palestinian population aged 15 and over of which 7.7% were males and 20.1% females. Distribution by locality type produced these results: 12.3% of the illiterates aged 15 and over were in urban areas, 16.7% of the illiterates aged 15 and over were in rural areas, and 13.4% of the illiterates aged 15 and over were in refugee camps.

The number of the Palestinian population of the Palestinian Territory¹ with diploma and higher reached 288,673 or 12.0% of the total number of the population in the age group of 10 years and over in the Palestinian Territory¹. Those specialized in business and administration occupied the first place at 18.9% of the graduates belonging to this category of Palestinians with diploma and higher. This was followed by specializing in humanities at 16.6% of the graduates.

In the 1997 census, humanities science occupied the first place at 21.9%, This was followed by specializing in business and administration science were 16.7% of the diploma and higher graduates .

4.2.5 Basic Characteristics of Labor

The number of economically active Palestinian population in the Palestinian Territory¹ is 779,259 or 32.4% of the total Palestinian population in the age group of 10 and over in the Palestinian Territory¹, including 672,715 males or 55.3% of the total male population in the

¹ Data exclude those parts of Jerusalem which were annexed by Israel in 1967.

age group of 10 and over in the Remaining Palestinian Territory and 106,544 females or 9.0% of the total female population in the age group of 10 and over in the Palestinian Territory².

The number of unemployed people of the Palestinian population of the Palestinian Territory² in the age group of 10 and over was 179,852 or 23.1% of the total population in the age group of 10 and over in the Palestinian Territory². The highest rate of unemployment by locality type was found at refugee camps at 28.0% followed by 24.0% at urban areas, and 17.1% at rural areas.

4.2.6 Basic characteristics of disability/Difficulty

The findings of the Census show that the number of the Palestinian population in the Palestinian Territory who have at least one disability/Difficulty is 159,217 or 4.6% of the total number of the Palestinian Territory² Palestinian population. The distribution of Palestinian people with disability/Difficulty by type is as follows: 86,209 persons have seeing disability/Difficulty or 2.5% of the total number of the Palestinian Territory² Palestinian population; 41,345 persons have hearing disability/Difficulty or 1.2% of the total number of the Palestinian Territory² Palestinian population; 62,009 persons have moving disability/Difficulty or 1.8% of the total number of the Palestinian Territory² Palestinian population; 23,169 persons have cognition disability/Difficulty or 0.7% of the total number of the Palestinian Territory² Palestinian population; and 23,436 persons have communication disability/Difficulty or 0.7% of the total number of the Palestinian Territory Palestinian population.

4.3 Findings of households' number

According to the findings of population count, the number of Palestinian private households, which were actually counted in the Palestinian Territory, totaled 627,980 households. The average size of the Palestinian Territory households is 5.8. The number of Palestinian nuclear families in the Palestinian Territory reached 505,285 or 80.5% of the total number of the Palestinian households.

² Data exclude those parts of Jerusalem which were annexed by Israel in 1967.

Chapter Five

Data Quality

5.1 Introduction

There are two types of error that can occur: statistical errors and non-statistical errors. Statistical errors occur in surveys using samples and do not exist in censuses. It is easy to measure errors and to estimate their rate since they result from errors in the sample. While non-statistical errors may occur at any stage of the implementation of the censuses or surveys, a system was required to control the quality of census data during the implementation of the second Palestinian Census of 2007 due to the many stages of work in planning and implementation that required various employees, hired for a short period, with variations in the quality of work that might affect the findings and reliability.

The main objective of the quality control program is to prevent or reduce the incidence of errors to the greatest extent possible and to detect errors in order to take appropriate measures to correct them. Without using such a program, census data might contain many errors and may not be suitable for use.

To achieve the required efficiency, a system of quality control was developed to control all stages, from the very beginning of the preparatory stage up to data processing and dissemination and to guarantee a high level of data quality. Quality control is of vital importance, particularly in the planning stage since it is connected with all stages to come. Thus, every stage was allocated enough time and procedures to ensure the high quality and reliability of census data.

5.2 Control Procedures in the Preparatory Stage

The preparatory phase took into account the development of simple definitions and instructions and compatibility with international recommendations and the needs of beneficiaries in the design of questionnaires so that instructions would be communicated clearly. Attention was paid to ensure that all booklets and questionnaires would be received, stored and that all booklets and questionnaires would be entered into the computer, in addition to preparing forms to control the quality of work, and the design and selection of data entry programs in advance.

A plan was made for updating localities with an enumeration areas manual with detailed maps where every establishment, building, housing, household and individual were counted. Adequate attention was given to special localities such as those where nomads reside, since they were covered in the census. Clear and simple instructions were developed for counting personnel at border crossings and the residents of collective housing.

Procedures were also established to examine the coverage rates of individuals and households through the post enumeration survey. Also taken into account was the printing of booklets and questionnaires to validate data collection, entry and storage. A type of indexed bag was used to store the households and housing conditions booklets and buildings booklets to ensure they would be easily accessible.

Through a pilot census, comprehensive testing was done for all questionnaires, tools, procedures, forms, fieldwork and office editing, PES, printing of questionnaires and manuals, selection of data entry programs and error detection programs, reviewing lists, coding

manuals and tabulation processes and preparatory stage dissemination in advance. The expected requirements of human and financial resources and a time schedule for the completion of all activities in this stage were estimated in advance.

5.3 Control Procedures in the Implementation Stage

5.3.1 Selection and Training of Employees

Given the magnitude of this project, the multiple levels, and the volume of employees, it was necessary to develop procedures to ensure the collection of reliable data. Maps of each area were updated under continuous supervision from the project management, who re-divided enumeration areas according to the ability of fieldworkers in various activities so as to achieve results on time.

The most qualified unemployed people were selected as employees, particularly those with higher scientific qualifications, of whom there are many in nearly all the governorates, except for Ramallah and Al-Bireh and Jerusalem where we had to employ a small number of Palestinian university students as enumerators. Fieldworkers had to be from the same locality to guarantee their efficiency in carrying out their work.

Plans and training programs for all employees were prepared in advance: census managers were trained in the governorates first, then they trained supervisors who participated in the training of enumerators and observers. As a precaution, at each stage PCBS trained an additional 30% more than the required number of employees as back-up staff in case of the resignation, dismissal, emergency conditions, or low achievement of existing staff.

5.3.2 Data Collection

Fieldworkers were distributed so that each supervisor had responsibility for managing five observers. Each observer supervised five enumerators, while each enumerator had to collect data for about 150 housing units within 15 days. The selection of employees was based on a standard assessment test and the individuals with the highest grades were selected and employed. The census directors (PCBS managers) were selected for their considerable experience in administrative and statistical work and some PCBS statisticians and fieldworkers were appointed to work as supervisors.

For counting purposes, the direct interview technique was used to obtain data from the head of household, or from a reasonable adult person. In the absence of the head of household or suitable person, the enumerator paid other visits to the household at different periods of time until data could be collected from a qualified individual.

Enumerators depended on official documents to collect basic data such as name, date of birth, identification number. They submitted a reminder questionnaire to the households to fill in the basic data required prior to the actual counting to save time and facilitate the task for both households and enumerators. Specific instructions were given to all employees at every level on how to conduct fieldwork and desk reviews and how to review and correct errors. The supervisor, for example, had to personally check at least two percent of the questionnaires from the observer and enumerator, in addition to checking the coverage and quality of data, particularly on the first days of work, and supervising the daily desk and fieldwork. Observers had to collect five percent of the data from the households where the enumerator had worked to ensure household coverage and the consistency of individual data, and notify the enumerators of their errors.

Every supervisor had to meet their fieldworkers on a daily basis to give new directions and instructions received from the operations room to correct errors that had occurred on the previous day. These supervisors had to conduct a daily desk review of what had been achieved by their subordinates. A campaign accompanied the activities of the census with the use of all means of media to encourage greater cooperation by citizens with census teams.

Many types of forms were developed regarding daily achievements and follow up, the preliminary findings and related materials, documents, supplies or deliveries received, monitoring of employees' work hours and follow up forms of household coverage.

A central operations room was formed at the PCBS headquarters in the West Bank and another in the Gaza Strip whose main task was to work 24 hours a day, including technicians, administrators and support services, to answer queries, meet needs and requirements and issue any general written instructions. In addition, a group of assistants in each governorate assisted the census director.

This census was also significant for using decentralized databases in the governorates through which the daily achievements of employees were registered and which controlled all technical and administrative work processes at every stage. This helped the census management and central operations room at PCBS headquarters to monitor work at various levels and take necessary action at the correct time.

The post enumeration survey was implemented for four percent of the total enumeration areas to examine the coverage rates of individuals and households and a complete re-count of all households and individuals in selected enumeration areas was conducted. This study showed that the under-coverage of individuals was three percent in the West Bank.

5.3.3 Refusal Cases

Several procedures were developed to cope with cases of refusal by private citizens, especially in the Jerusalem governorate and surrounding communities as a result of Israeli harassment of Palestinians residing in these areas. These procedures included field visits by members of the central operations room and the participation of officials.

5.4 Control Procedures in the Data Processing Stage

The data processing stage includes editing, coding, data entry, reviewing lists and checking all previous operations of data entry for all enumeration areas. All procedures and instructions were conducted to check the consistency of the data and coding fields and ensure the entry of all enumeration areas and booklets and questionnaires, with their content of buildings and housing units, households and data on individuals. As booklets and questionnaires required checking and moving from one operation site to another, a store was prepared for all the documents to be indexed and categorized and the store keeper controlled the flow of documents.

Coding manuals were prepared and examined beforehand, as well as the instructions for editing and coding procedures to check the consistency of the data and how to detect and correct errors. All editing and coding employees were selected from among the best fieldworkers who collected the data from households and individuals. Training was conducted centrally to ensure uniform concepts and to eliminate disparities in fieldwork in all governorates. Editing, coding and testing the consistency of 100% of the questionnaires was

conducted, in addition to desk reviewing, editing and coding (100%) in order to eliminate differences between individual editors and to discover and correct errors and circulate them daily.

Tests were held for all applicants for data entry and those who performed best were trained centrally in a uniform procedure of data entry. During the first three days, all data entered were deleted and re-entered again to correct errors and inform employees so as to avoid such errors in the future. Certain procedures were adopted to ensure correct data entry: in the first stage a unique separate file was prepared for each enumeration area that included identification data (to ensure coverage), the number of households and the total number of booklets to ensure that all booklets and all households had been entered. Upon data entry, a thorough examination of the identification data and the range of each digital key question was conducted so that the computer did not accept any figure outside this range. For example, the relationship of the head of the household, sex and all the pre-coded questions in the household and housing conditions questionnaire, and the type of building in the buildings questionnaire. The remaining questions were exposed to a comprehensive re-examination of the range of each question after data entry and the extraction of error lists resulting from data inconsistency.

After data entry, certain lists were extracted to ensure the coverage of all enumeration areas, buildings, housing units, households and individuals, and to examine the internal consistency of the data of each unit. The procedures used were to extract error lists that must be corrected or questioned. These lists were submitted to the best reviewers under full supervision of the technical operations in the census directorate.

Specific previously prepared programs were used to detect errors according to the following procedures:

1. A manual was prepared of instructions for desk editing and procedures for the questionnaire of household and housing conditions. A set of desk editing instructions were printed and the procedures for the buildings questionnaire containing tests designed to ensure the coverage of data entry, to detect inconsistencies or to detect abnormal and rare cases. These were reviewed and printed with a name and number given to every error in the manual.
2. A list was extracted for each enumeration area, including the identification data of each building, housing unit, household or individual message (type of check) and the number printed in the manual. The auditor could then recognize the message name and type of error, location and procedures of editing and audit procedures patch, which consists of more than six hundred checks on several stages.
3. Lists were submitted to the reviewers to return to the original booklets. If the error was caused by data entry, it would be corrected on the list. If the error was due to fieldwork, all associated questions should be considered for correction. For example, if the type of housing was a tent or a separate room, the number of rooms must be one by definition. The first check would be conducted through manual editing, then extracting the electronic lists after data entry for such types of tests, then they would be corrected manually on the original booklets and data re-entered correctly. As for the coverage test, there is a key reference that contains all enumeration areas and shows the number of booklets and households in the enumeration area to be entered on the computer. At this point, if there was a variation between the number of booklets and households actually entered and the total number of households in the file of each area, an error message

appears to request correction. Through this method, we ensured that 100% of the households were entered. By the same method, we ensured that all household members were entered through connecting the manually prepared summary of household members and the entered data of each household, and the number of individuals distributed by sex by the individual number in the household to ensure that 100% of household members were counted and entered according to their gender. In addition, there was a unique sequence number for each household in the enumeration area.

Cases which were non applicable were coded as such and represented by the figure 9 according to the number of digits for each question, unless there was a certain indication that led to selecting the suitable answer for variables, such as gender and the relationship of head of household in the questionnaire of households and housing conditions.

1. All enumeration area lists were extracted in this way and all kinds of tests.
2. Amended lists were sent back to data entry to be entered and corrected and a copy of the daily entered data was kept in several different places.
3. Previous stages were conducted twice or more until the data of each enumeration area became clean.
4. All files were compiled for enumeration areas of each locality of each governorate. Then, all tables and any additional tests were conducted with the participation of specialists in different areas (demography, education, labor force, housing, buildings, etc.) to test the data before the final tabulation in order to correct errors according to the aforementioned procedures.

5.5 Data Quality Assurance

The process of census results evaluation by estimating the values of errors and trends is considered to be a necessary process to answer questions concerning the accuracy and coverage of census data and to defend the credibility of findings. There are several methods and tools to evaluate the results of the census in terms of coverage and content, which include either a single source of data (the census itself) or multiple sources. The use of multiple sources, in turn, may take two forms: either by comparing the booklets of individuals or comparing the overall values.

The quality testing program for the Census 2007 contains several methods for measuring the quality and coverage of data and trends, focusing on several areas such as the post enumeration survey (matching individual booklets), comparison with administrative booklets, comparison with the results of household surveys, and conducting demographic analysis. The following is a detailed explanation of these areas:

5.5.1 Post Enumeration Survey (PES)

The post enumeration survey is a sample survey conducted shortly after the census to assess the census. PES usually consists of two types of match studies: an identical study to measure coverage errors and a re-interview survey for the purposes of assessing errors in the content of census data with respect to population indicators.

The PES is usually the only reliable method of measuring errors in census coverage in developing countries, if we take into account the lack of accurate administrative registers and the limited availability of accurate demographic data on fertility, mortality and internal migration. In addition, the method of matching individual records provides the possibility of

obtaining separate estimates on both coverage errors and content errors, which is not easily achieved in studies that do not adopt the method of matching individual records.

In the PES, the quality control of data is easier due to the limited area of study, that is, a sample of areas. On the other hand, the PES process includes an additional operation that is not included in the census, which is the matching process between census booklets and the booklets of PES and this additional step would include non-statistical errors. Due to this, all supervisors and enumerators should be prepared and well qualified, with a rate of supervisors to enumerators of one to five. It is essential to appoint professional and adequately trained officials at all stages.

Although the PES was not designed to be fully independent of the census, as the enumeration areas of the census will be used as preview units for the PES, the following points should be taken into account:

1. The return of all census questionnaires from the field before the start of counting in the PES.
2. Counting the areas of the PES by teams of fieldworkers, excluding those who worked as enumerators in the census. (It is logical to employ census supervisors and observers to work in the PES in order to benefit from their experience, as long as they are appointed to work in areas other than those they worked in during the census.)
3. The employees of the PES must not have any prior information about census findings in the enumeration areas in which they are going to work.
4. The employees of the census also must not know which enumeration areas will be selected to conduct the PES later.
5. The data of the PES must be processed separately from the census data.

Description of Used Frame

The frame of the PES includes all the enumeration areas of the Census-2007, which totaled 4,916 enumeration areas distributed in all governorates of the West Bank and Gaza Strip. To implement the PES, 218 enumeration areas were chosen to be a stratified cluster sample designed for a single-stage, where all households in the selected enumeration areas in the sample were collected.

5.5.2 Assessment of Coverage Based on PES

The rate of coverage was estimated for individuals nationally and key areas of research. The following table shows these percentages for the West Bank

Percentages of coverage and under-coverage rates for individuals in governorates in the Palestinian Territory

Governorate	Coverage Rates	Under-coverage Rates
Palestinian Territory	97.3%	2.7%
West Bank	97.0%	3.0%
Jenin	98.1%	1.9%
Tubas	95.8%	4.2%
Tulkarm	99.2%	0.8%
Nablus	98.5%	1.5%
Qalqiliya	97.1%	2.9%
Salfit	98.7%	1.3%
Ramallah & Al-Bireh	94.0%	6.0%
Jericho & Al Aghwar	95.5%	4.5%
Jerusalem	95.8%	4.2%
Bethlehem	96.4%	3.6%
Hebron	97.5%	2.5%
Gaza Strip	97.9%	2.1%
North Gaza	98.1%	1.9%
Gaza	97.6%	2.4%
Dier al Balah	97.7%	2.3%
Khan Yunis	98.2%	1.8%
Rafah	98.4%	1.6%

5.5.3 Internal Data Consistency Testing

Given the fact that the Population, Housing and Establishments Census-2007 is the second census on population, households, individuals, buildings and housing units and their detailed characteristics, the issue of testing data quality by all possible means was of paramount importance, especially internal data consistency and comparing the findings with other surveys.

Based on the distinct experience of the census, certain instructions were developed during fieldwork implementation to assure high data quality and to develop procedures and forms to control supervision and follow up.

Certain rules for desk editing and procedures to detect consistency errors and correct them were drawn up. During the cleaning process, many tables and detailed editing were extracted, reviewed and tested by the census directorate and by those concerned with the subject from other directorates.

In addition, a copy of the raw data was handed over to each subject specialist to test the accuracy, data quality and consistency of procedures before the process of extracting the final tables and to make any adjustments required.

5.5.4 Comparison of Findings with Other Sources

The census data and indicators were compared by the subject specialists and census directorate with the common data and indicators of surveys. A comparison was conducted between the key indicators and the derived rates from census data in several areas. Comparison was made with indicators of the Household Health Survey 2006, Demographic Survey 2004 and Health Survey 2000, in addition to comparisons with the previous census findings of 1997, particularly with regard to population, distribution of gender and age, total fertility rates, average household volume and household composition. The results indicated considerable consistency between them. Comparison of disability indicators with Census-1997 findings and the Health Survey 1996 was difficult and even impossible due to variations of the concepts of disability and difficulty.

With regard to housing and housing conditions, data were compared with common indicators of census and household surveys, particularly indicators of the number of rooms per household, housing density, and the type of housing. In general, most results were close and logical.

When comparing the Census-2007 with Census-1997 indicators and with certain selected surveys, the results were as illustrated in the table below. The data were of high quality and differences are logical and justified. There is consistency between indicators drawn from different sources, taking into account the reference date and work methodologies to explain variances where they exist.

Comparison Table of Selected Indicators in Census and Surveys

Indicator	Census 1997	Health Survey 2000	Demographic Health Survey 2004	PAPFAM 2006	Census 2007
Sex Ratio	103.2	102.1	102.8	102.8	103.0
Median Age	16.0	16.0	16.0	16.0	17.0
Age distribution					
0-14	47.0	46.9	45.7	45.5	41.9
15-64	49.5	49.7	51.2	51.5	53.4
65+	3.5	3.4	3.1	3.0	3.0
Proportional distribution of households					
One person	3.3	3.7	4.3	3.5	3.6
Nuclear household	73.2	77.5	83.0	78.1	80.5
Extended household	23.0	18.6	12.6	18.3	14.7
Composite household	0.5	0.2	0.1	0.1	0.2
Not Stated	0.0	0.0	0.0	0.0	1.0
Household Size	6.4	6.1	5.7	6.3	5.8
No. of persons per room	2.0	2.0	1.9	1.8	1.6

5.5.5 Treatment of Not Stated

Percentage of Not Stated in the Palestinian Territory for Selected Indicators

Indicators	Percentage of not Stated
Age	1.4
Marital status	0.4
Refugee status	1.3
Religion	1.4
Type of housing unit	0.8
Relation to labor force	0.3
Enrollment in education	0.2

5.5.6 Use of Demographic Analysis Methods

The use of demographic analysis methods to assess the population data of censuses is considered one of the common methods for assessing the quality of data. It can assess the data of age, age structure and sex in the community through estimating certain demographic measures. The following were conducted:

- Calculating some index numbers to measure the accuracy of age data and preference of individual age such as: Myers number, Patchi, Wipple and the Secretariat of the United Nations.
- Calculating the percentages of different age groups.
- Calculating the sex ratio for age groups.
- Calculating the percentage of not stated.
- Examining internal consistency between the relevant variables when extracting the tables.

This had logical and acceptable results within the standards and recommendations.
