* Data doesn't include those parts of Jerusalem which were Annexed by Israel in 1967.

* البيانات لا تشمل ذلك الجزء من محافظة القدس والذي ضمته اسرائيل عنوة بعيد احتلالها للضفة الغربية في عام 1967.

The number of settlers in the years 2010, 2011 based on the Israeli census data which was implemented in year 2008, while the data on the number of settlers differ for the years 2008, 2009 from the previous reports that were revised according to the Israeli census data of 2008.

أعداد المستعمرين للعامين 2010، 2011 تستند إلى بيانات تعداد السكان الاسرائيلي الذي تم تنفيذه عام 2008، في حين تختلف بيانات أعداد المستعمرين للعامين 2008، 2009 عن التقارير السابقة لتتقيحها بناء على بيانات التعداد الاسرائيلي 2008

Acknowledgments

The Palestinian Central Bureau of Statistics (PCBS) would like to thank all the Palestinian organizations that cooperated in the preparation of this report and appreciates their assistance in bring this report to publication.

The Israeli Settlements in the Palestinian Territory Report of 2011 was prepared by a technical team from PCBS with joint funding from the Palestinian National Authority (PNA) and the Core Funding Group (CFG) for 2012, represented by the Representative Office of Norway to the PNA and the Swiss Development and Cooperation Agency (SDC).

Moreover, PCBS very much appreciates the distinctive efforts of the Core Funding Group (CFG) for their valuable contribution to funding the project.

Important Remarks

Data are for the period up to the end of 2011 unless otherwise stated.

The Statistics presented in this report are derived from various sources, which are not fully consistent and this should be taken into consideration.

For the purpose of correlating area with population, a number of settlements of Jerusalem J1 were joined together in this report. As a result, the number of settlements was reduced from 22 settlements in 2003 to 16 settlements in the period 2004-2011. It should be emphasized that this decrease in number does not indicate in any way a reduction in settlement in that area.

The data presented in this report on the number of settlements, occupation sites are not consistent with what is reported from other sources due to the different definitions and classifications.

The number of settlers in the years 2010, 2011 based on the Israeli census data which was implemented in year 2008, while the data on the number of settlers differ for the years 2008, 2009 from the previous reports that were revised according to the Israeli census data of 2008.

There are no population of Six settlements appeared in this report which are located in Jerusalem, Tubas, Bethlehem and Jericho & Al-Aghwar governorates.

Introduction

Israeli settlement activities in the Palestinian Territory constitute the most serious danger of the Israeli occupation and hampers the establishment of a viable national Palestinian state in the West Bank and the Gaza Strip. With supported from the Israeli government, many Israeli organizations and institutions are working on the implementation of an organized program that aims to expand the settlements in the Palestinian Territory. Indeed, the settlements network and the accompanying changes in demographical and topographical aspects are the main obstacle to establish a Palestinian state with geographical continuity.

The Israeli settlement movement not only affects the political stability and security in the Palestinian Territory. It also destroys the social, economic, and environmental balance of Palestinian society and land by hampering the development of Palestinian society, polluting the Palestinian environment, and playing a significant role in controlling, destroying and cantonizing Palestinian communities and territory. Moreover, Israeli settlements are used as military bases to launch aggression, incursions and hostilities against the Palestinian people. The effects of building and expanding Israeli settlements on Palestinian land have been devastating to Palestinian communities and daily assaults by Israeli settlers are observed by Israeli soldiers without taking any action to halt such activities.

We continue to publish annual reports in this series to present the main developments in Israeli settlement activities in the Palestinian Territory. We have focused on presenting quantitative descriptions of a number of main indicators related to settlements and settlers.

This report contains statistical data for the year 2011, about the population and geographical indicators of Israeli settlements in the West Bank: the number of settlers, the level and nature of settlement, the geographical spread, prevalent ideology, and other related subjects.

This report is divided into three chapters: The first chapter contains the main findings. The second chapter explains the methodology of the collection and tabulation of data, and data quality and the assessment of data sources. Finally, the third chapter presents the concepts and definitions in this report

August, 2012

**Ola Awad
President of PCBS**

Chapter One

Main Findings**1.1 Settlements**

According to 2011 data, there were a total of 144 settlements in the West Bank, the majority of them in Jerusalem governorate: 26 settlements of which 16 have been annexed by Israel.

Number of Settlements in the West Bank, by Governorate, 2011**1.2 The Settlers Population**

Data indicate that the number of settlers in the West Bank in 2011 was 536,932, most of them living in Jerusalem governorate (267,643 settlers), including 199,647 in Jerusalem Governorate (J1).

Number of Settlers in the Settlements in the West Bank, by Governorate, 2011

1.3 Settling Stages

Israel has resorted to the expansion of existing settlements during this period in order to compensate for the lack of new settlements. Expansion is achieved through growth in population and establishing new 'neighborhoods' within existing settlements. In addition, the building of the Annexation and Expansion Wall in June 2002, designed as a result of internal negotiations between the Israeli government and settler leaders, has placed 88% of settlers inside the borders of the Wall.

Overall, the number of settlements increased between 1967 and 2011 from one settlement in 1967 to 144 in 2011.

Number of Settlers in the Settlements in the West Bank by Year, 1988-2011

1.4 The Nature of Settling in the West Bank

In 2011, there were 50 urban settlements in the West Bank, with 22 of them in Jerusalem governorate. Settlers of this type of settlement represent 88.8% of the total settlers in the West Bank. These settlers are concentrated in Jerusalem governorate (98.7% of the total settlers in the governorate), followed by Qalqiliya governorate (94.3% of the total settlers in the governorate), then Bethlehem governorate (90.1% of the total settlers in the governorate), then Ramallah & Al-Bireh governorate (88.9% of the total settlers in the governorate), then Salfit governorate (72.5% of the total settlers in the governorate). There are no urban settlements in Jenin, and Tubas governorates.

In 2011, the data showed that there were 94 rural settlements in the West Bank, with 50 of them classified as communal settlements with a population of 44,254 settlers, followed by moshav settlements (17 settlements with a population of 4,033 settlers).

1.5 Geographical Dispersion

Eastern Strip:

At the end of 2011, this area included 28 settlements with a population of 6,450 settlers representing 1.2% of all settlers in the West Bank.

Mountain Strip:

At the end of 2011, this area included 31 settlements with a population of 47,468 settlers representing 8.8% of all settlers in the West Bank.

Western Hills Strip:

At the end of 2011, this area included 48 settlements with a population of 155,396 settlers representing 29.0% of all settlers in the West Bank.

Greater Jerusalem Strip:

At the end of 2010, this area included 37 settlements with a population of 327,618 settlers representing 61.0% of all settlers in the West Bank.

Chapter Two

Methodology and Data Quality

This section presents the methodology used in data collection from different sources: Applied Research Institute-Jerusalem (ARIJ), Israeli Central Bureau of Statistics, Jerusalem Institute for Israeli Studies, and Israeli Information Center for Human Rights in the Occupied Territories - B'TSELEM.

2.1 Coverage

Data of Israeli settlements include all the areas classified by the Palestinian Official sources as West Bank, including settlements in J1, and no-man's-land in Ramallah & Al-Bireh Governorate, closed military areas along the green line in the West Bank.

Figures in the Israeli Settlements in the Palestinian Territory Report were based on the database created to supply data about Israeli settlements in the Palestinian Territory.

2.2 Data Sources

Israeli Settlements Database

Starting in 2002, PCBS has created and developed a database including all the Israeli settlements in the Palestinian Territory. The database has been continuously updated using various data sources, such as the Palestinian Ministry of Planning, and a number of Palestinian and Israeli sources, in addition to estimates based on statistical assumptions.

Israeli Central Bureau of Statistics

ICBS represents the main source of data on annual population of Israeli settlements and the establishment date of settlements, the type of settlements, regional council and institutional affiliations.

It should be noted that this data source only covers Israeli settlements located in the West Bank. There are no data on settlements in the Jerusalem area (J1).

The Jerusalem Institute for Israeli Studies

The Jerusalem Institute for Israeli Studies represents the main source of data for the settler population of the settlements located in the Jerusalem area (J1).

2.3 Data Processing

The Israeli settlements database contains many fields necessary for the preparation of tables; this database is updated annually and statistical tables were extracted based on the updated data. Updating the data relates to the population of each settlement and the classification of new fields as either updated or revised as follows:

1. Linking the population of each settlement with a population of attribution and the settlements for which data are available; data are usually updated yearly by Israeli statistics.
2. With regard to settlements whose total population was not available for the reference period (often those with less than 1000 people), a population estimate was calculated based on the latest data available, using an assumption of the constant annual growth rate for the last two years for each settlement.
3. Re-examining the population of each settlement to change the classification depending on the number of people in the reference year. For example, for settlements with a

population of over 2000, the classification may be changed from rural to urban and all fields related to this classification will be changed.

4. After updating the database, comprehensive editing and comparisons were done to examine the logic and consistency of the figures compared with previous data.
5. Matching the results in the database with the results in the original sources and within the same geographic area of comparable data.

Extraction tables and verification of results

2.4 Accuracy of the Data

Number of Population:

The number of settlers for the settlements where there is lack of detailed data about the population was estimated based on the constant annual growth rate of the latest two years according to available data.

Due to the unusual dimension of population growth, the sources of this growth cannot respond to hypotheses that include demographic exceptions, particularly flow of immigration or political trends that lead to discrepancies in population levels.

However, the general estimates at the level of the West Bank are statistically accurate and reflect a margin error of $\pm 6\%$.

2.5 Technical Notes

- For the purpose of correlating area with population, a number of settlements in Jerusalem-J1 were joined together in this report. As a result, the number of settlements was reduced from 22 settlements in 2003 to 16 in the period 2004-2011. It should be emphasized that this decrease does not in any way point to an actual reduction in the number of settlements in that area.
- There is a lack of coverage of some data from all sources.
- Data derived from the publications of the Israel Central Bureau of Statistics do not include that part of Jerusalem annexed by Israel in 1967, in addition to settlements annexed by Israel from Ramallah and al-Bireh or Hebron governorates.
- The statistics presented in this report are derived from various sources which are not fully consistent and it is therefore advisable to take this into consideration when using these statistics.
- The population data of settlements with less than 1000 settlers and the population of settlements in the J1 area are not available for 2007. These data were estimated using the assumptions mentioned previously based on the rate of growth.

Chapter Three

Concepts and Definitions

A Settlement:

A settlement, which is considered by the Israeli occupation as legal settlement and meets locality conditions. The Israeli Central Bureau of Statistics defines a locality as follows:

An inhabited place according to the following criteria:

1. Mainly has 20 or more inhabitants.
2. Self-ruled.
3. Not included in the formal borders of another locality.
4. Formally recognized.

In addition to the settlements and Jewish neighborhoods; located in Jerusalem (J1).

Outpost:

Civil or semi military building, which is not recognized by Israeli authority. However, the recognition would come later at the politically correct moment. Accordingly, an outpost may become a settlement or a military base.

Occupation Site:

Includes settlements, outposts, military settlements, semi-military settlements, agricultural settlements, Israeli industrial areas and Israeli military bases.

Yesha Council:

It refers to the council that represents settlers in the West Bank except that part of Jerusalem which was forcefully Annexed by Israel following its occupation of the West Bank in 1967. Yesha is also the representing body of a number of regional councils.

Regional Council:

It's an administrative authority representing a number of settlements.

Built –Up land in the Occupation Site:

It refers to all areas of human activity within a settlement including built-up areas, service facilities, public parks, squares, and roads. It excludes any land that is planned for construction according to the structural plan of the occupation site or confiscated land to be annexed later to the occupation site.

Urban Settlement:

It's a settlement that has 2000 or more inhabitants, beside those settlements located inside Jerusalem area (J1), which are classified as urban settlements regardless of the number of population.

Rural Settlement:

It's a settlement that has less than 2,000 inhabitants, also includes agricultural localities, excluding settlements located inside Jerusalem area (J1), which are classified as urban settlements regardless of the number of population.

Moshav:

It refers to the rural settlement organized as a cooperative association, which has the right to agricultural farmland (as defined by the Israel Lands Administration). These settlements consist of family units, each of which is an independent economic entity. Part of the

production and economic administration of the moshav is handled by the cooperative association, and the residents determine the degree of cooperation.

Collective Moshav:

It refers to a collective rural settlement where production and marketing are cooperative and consumption is private.

Kibbutz:

It refers to a collective rural settlement with cooperative production, marketing, and consumption.

Institutional Settlement:

It refers to an institution, which has the characteristics of a settlement but is not within the administrative boundaries of another settlement.

Communal Settlement:

It refers to a settlement organized as a cooperative association, which has no right to farmland and its members determine the extent of its cooperative activities concerning production, consumption, municipal, and social activities.

Other Rural Settlement:

It's a settlement that has less than 2,000 inhabitants and not found in any type of the settlements above.

Geographical Dispersion:

This classification divides the West Bank into four areas (strips): the mountain strip, the western hills strip, and greater Jerusalem strip.

Each area includes settlements that share certain similarities in terms of topography, proximity to Palestinian communities and main roads, economic infrastructure, the composition of the population, distance from the Green Line, and other similarities.

The Eastern Strip: includes the Jordan Valley area and the shores of the Dead Sea (outside the Green Line), as well as the eastern slopes of the mountain range that divides the entire West Bank from north to south.

The Mountain Strip: the area on or adjacent to the peaks of the mountain range. This area is also known as the watershed line or the mountain-peak area.

The Western Hills Strip: includes the western slopes of the mountain range, and extends to the Green Line to the west.

Greater Jerusalem Strip: this area extends across a wide radius around West Jerusalem. Although in purely geographical terms this area lies mainly in the Mountain Strip, it has unique characteristics that demand separate attention.

Average altitude (Meters):

The average height of land above the level of the Sea (meter) in relation to main population center.

Jerusalem (J1):

Those parts of Jerusalem, which were annexed by Israel in 1967. These parts include the following localities: (Beit Hanina, Shu'fat Refugees Camp, Shu'fat, Al' Isawiya, Sheikh

Jarrah, Wadi Al - Joz, Bab Al-Sahira, As Suwwana, At -Tur, Jerusalem “Al - Quds”, Ash - Shayyah, Ras Al-Amud, Silwan, Ath – Thuri, Jabal Al – Mukabbir, As – Sawahira Al – Gharbiya, Beit Safafa, Sharafat, Sur Bahir, and Um Tuba, Kufr A’qab).

Jerusalem (J2):

Includes the remaining parts of Jerusalem governorate, namely: Rafat, Mikhmas, Qalandya Refugee Camp, the Bedouin Community-Jaba’, Qalandya, Beit Duqqu, Jaba’, Al-Judeira, Beit Anan, Al-Ram, Dahiat Al-Bareed, Al-Jib, Bir Nabala, Beit Ijza, Al-Qubeiba, Khirbet Um Al-Lahem, Biddu, An-Nabi Samu’eil, Hizma, Beit Hanina Al Tehta, Qatanna, Beit Surik, Beit Iksa, A’nata, The Bedouin Community – Al-Khan Al-Ahmar, Az Za’eem, Al-Sawahreh Al-Sharqiyeh, Ash-Sheikh Sa’d, The Bedouin Communities. Al-Eizariya, Abu Dis.

A set of special symbols was used in the tables of this report

- (-): Nil
