Notice to users of this report:

All Statistical information presented in this report are based on a reported data by the households of the localities, which the Expansion and Annexation Wall passed through. The survey covers the households in the localities which the separation wall passed through, till the date of data collection.

PCBS warns against using the statistical information related to the area of confiscated land. Respondents usually intend to report incomplete information about the area of confiscated land.

Concepts and Definitions

Reference Period:

There are four reference periods in this survey:

1. Since the beginning of construction of the wall until the end of July 2006.
2. Before and after building the wall.
3. During the last month.
4. During the last Week.

Locality:

A permanently inhabited place, with an independent municipal administration or other type of adopted administration.

Location from Expansion and Annexation Wall

Refers to the location place of the locality or land of the locality, or household from the wall:

1. Inside the Wall:

Includes all the localities located between the green line and the wall.

2. Outside the Wall:

Includes all the localities located outside the wall.

Area of Confiscated Lands:

The total area which was confiscated by Israeli occupation forces from the land of localities to construct the wall (usually taken by military order).

Humanitarian Aid:

Any cash real humanitarian aid, regardless of the source, that is received by households because of the deteriorating living conditions due to measures taken by Israeli occupation forces during the wall construction.

Press Release

On the Main Findings of the Survey on the Impact of the Expansion and Annexation Wall on the Social and Economical Conditions of the Palestinian Households in the Localities which the Wall Passe Through (August 2006)

47.7% of the households in the localities affected by the wall was Confiscated there Land, 86.9% of the Households depend on their monthly income, and 87.0% of the households living inside the wall report that the wall affected their ability to visit family and relatives

PCBS conducted a household survey in the Palestinian localities where the Expansion and Annexation wall passes through in the West Bank. The sample size was 3,910 households, while the sample size for completed questionnaires was 3,410 households. Data collection took place during 12 August to 24 September 2006 this survey comes as a part of the surveillance system to monitor the impact of the Israeli measures on the well being of the Palestinian people.

The Overall Trend of Indicators:

The results of these survey rounds indicate that the negative effect of the wall and restrictions on the movements of individuals have been decreased during 2003-2006. The percentage of individuals whom the time spent to pass has restricted their movement has been decreased in the localities inside the wall from 93.1% in October 2003, to 82.9% in August 2006, and decreased in the localities outside the wall from 80.7% to 56.5% during the same period.

The percentage of individuals that the time schedule for passage has restricted their movement in the localities inside the wall has been decreased from 89.6% in October 2003, to 81.2% in August 2006, while there are limited changes in localities outside the wall for the same period. The percentage of persons that the crossing needs special conditions (Permission, Some ID cards), has been increased in the localities inside the wall from 74.1% in October 2003, to 75.5% in August 2006, while in the localities outside the wall it decreased from 61.0% to 43.4% only during the same period.

The percentage of households or one of its member separated from their relatives has decreased also in the localities outside and inside the wall during 2003-2006.

Governorates and Localities which effected by the wall:

The number of governorate which effected by the wall in the west bank has been increased during 2003-2006, from 6 to 8, and the number of localities which effected by the wall in the west bank has been increased in the same period, from 76 to 159 localities (13 locality inside the wall and 146 locality outside the wall), while the population number in the localities effected by the wall in the west bank has been increased from 397 thousands in October 2003 to 654 thousands in August 2006.

The effect of the Expansion and Annexation Wall and the Security Situation on the education:

The results revealed that 4.0% of the individuals in the localities affected by the wall left their education due to the security situation and the expansion and annexation wall, while it's noticed that 22.2% of the individuals in the affected localities left their education due to the bad economic conditions.

The results show that 85.3% of Palestinian households in the localities affected by the wall that have some members attending higher education used detour roads in order to reach their

universities and colleges as a method of adaptation with the difficulties they face, and 65.3% of the households were forced to be absent from university and college due to the closure.

Families dissociation from each other and from relatives:

30.5% of Palestinian households or one of their individuals in the localities affected by the expansion and annexation wall have been separated from relatives (39.4% inside of the wall and 30.3% outside of the wall).

Separation from health services and obstacles against movements and transportation:

The survey results indicated that 65.0% of the Palestinian households living inside of the wall indicated that separation from the health services (hospitals and medical centers) in the main cities formed an obstacle for them to get the required health services, while this percentage was 39.4% in the outside of the wall. Also the disability of medical staff to reach the localities formed obstacle for 63.3% of the households located inside of the wall and 36.3% of the households located outside of the wall.

The results concerning the obstacles against movement and transportation for individuals/some of the individuals living inside of the wall also showed that 82.9% of the Palestinian households reported that the time required for transportation and crossing checkpoints was a main obstacle against movement.

Land confiscation:

The results revealed that the percentage of households whose lands were confiscated totally was 16.6% of the households living inside of the wall against 19.3% for outside of the wall, while the percentage of the households living inside of the wall whose parts of their land were confiscated was 29.6% against 28.4% for outside of the wall. It's noticed that most of the confiscated land in the localities affected by the wall were used for agriculture, and it amounted 87.5%.

Labor market in the localities affected by the wall:

The unemployment rate in the localities affected by the expansion and annexation wall amounted 32.0%, (23.4% inside of the wall and 32.3% outside of the wall).

Most of the workers in the localities affected by the wall were paid workers as their (69.5%), while it's noticeable that the percentages of employers and self-employed workers amounted 24.7%. The results also revealed that 17.1% of workers in the localities affected by the wall works in Israel and settlements (24.6 % inside of the wall and 16.8% outside of the wall).

Humanitarian aid

Results show that 6.4% of households or one/some of their individuals in the localities affected by the wall reported that they received humanitarian assistance during July 2006, (7.2% inside of the wall and 6.3% outside of the wall).

Concerning the kind of assistance 70.6% of the total assistance were provided in the form of food supplies, and 23.9% were in cash

Steadfastness strategies:

The results indicated that the households in the Palestinian localities affected by the wall depended on several methods to steadfast during the last six months, as 86.9% of the households in the Palestinian Territory reported that they depend on their monthly income, where as 83.0% reduced there monthly expenditure, and 74.5% delayed payment of bills, and

53.9% of the Palestinian households of the Palestinian households Borrowed money from others.

Income Sources

Results of the survey indicated that 25.6% of the Palestinian households living in localities affected by the wall depended on wages and salaries from Palestinian private sector as a main income source before the construction of the wall, against 32.5% depend on this source after the construction of the wall, also 38.9% of the Palestinian households living localities affected by the wall depended on wages and salaries from the Israeli working sectors before the construction of the wall, against 21.7% depend on the same source after the construction of the wall, also 20.3% of the Palestinian households living localities affected by the wall depended on households projects before the construction of the wall, against 21.8% depend on the same source after the construction of the wall, and 15.8% of the Palestinian households living localities affected by the wall depended on wages and salaries from the national government before the construction of the wall, against 17.9% depend on the same source after the construction of the wall, and 23.9% of the Palestinian households living localities affected by the wall depended on agriculture sector before the construction of the wall, against 20.2% depend on the same source after the construction of the wall,

Priority needs of households

The results reveal that 47.4% of households in the localities affected by the expansion and annexation wall reported the need for work as top priority for their localities (47.7% inside of the wall and 39.8% outside of the wall), and 23.4% of the households reported the need for improving the infrastructure in their localities as top priority for these localities (23.4% inside of the wall and 24.5% outside of the wall), while 12.0% of households expressed the need for medical services in their localities (11.9% inside of the wall and 15.8% outside of the wall), and 7.2% of households in the localities affected by the wall expressed the need for security and stability as a top priority for their localities (7.0% inside of the wall and 12.2% outside of the wall).

Concerning the needs of the households the results showed that 50.5% of the households in the localities affected by the expansion and annexation wall expressed the need for food as a top priority, and 23.7% of households expressed the need for work and money, and 11.1% of households expressed the need for education, and 9.8% of households expressed the need for treatments.

Effects of the wall on the family and social relationships:

The results showed that 87.0% of households living inside of the wall had their ability to visit family and relatives been affected by the wall, against 53.1% of the households living outside of the wall. The wall also affected the ability of households to visit religious and holy places at 95.2% for inside of the wall, against 88.1% for outside of the wall.
