**Palestinian Balance of Payments – Fourth
Quarter 2011**

**Palestinian Central Bureau of
Statistics (PCBS) and Palestine
Monetary Authority (PMA)
announce the preliminary results
of the Palestinian Balance of
Payments – Fourth Quarter 2011.**

**USD 401 Million is the Deficit in
Current Account.**

The Balance of Payments (BOP) is an account measuring transactions between residents and non-residents in a given period. It is considered to be the peak of efforts in preparing systematic economic statistics that are necessary for observing economic performance in general and for deriving essential data used in compiling the Rest of the World Account as part of the Palestinian National Accounts. BoP consists of two main accounts, the Current Account and the Capital and Financial Account.

The main findings of the preliminary results of BOP for the fourth quarter of 2011 are including:

The continuous deficit of the Current Account amounted to USD 400.9 million (15.2 percent of the GDP at current prices for the fourth quarter of 2011), this deficit decreased by 1.8 percent compared to the previous quarter, The deficit of Current Account was caused mainly by the deficit in the Trade Balance of goods which was USD 964.5 million (36.6 percent of the

GDP at current prices) which decreased by 14.4 percent compared to the previous quarter.

The deficit in Services Balance amounted to USD 44.9 million, decreased by 51.3 percent compared to the previous quarter. The decrease in this deficit was caused by the increase of the exports in travel services and government services in addition to the decrease of the imports in government services and travel services.

The surplus in Income Balance (compensations of employees and investments income) amounted to USD 287.0 million decreased by 5.9 percent compared to the previous Quarter, this surplus was due to surplus in Compensations of Employees working in Israel which reached USD 258.4 million. Meanwhile, the received investments income amounted to USD 28.6 million, mainly caused by the interest received on the Palestinian deposits in banks abroad.

According to the Net Current Transfers, the surplus value amounted to USD 321.5 million decreased by 36.4 percent compared to the previous quarter. The donors' current transfers was 40.4 percent of total value of receipts from abroad.

The surplus value of Capital and Financial Account amounted to USD 477.2 million, mainly caused by the surplus in Financial Account amounted to USD 401.1 million (Direct Investments, Portfolio Investments, Other Investments, and Reserve Assets).

The changes on Reserve Assets flow (increase) amounted to USD 110.4 million in PMA, which are reflected in the Overall Balance surplus in the Palestinian case due to the absence of other financing resources. For further details please contact:
