### **Important Note:**

All Statistical information presented in this report are based or a reported data by the heads of local authorities of the communities, which the separation wall passed through.

PCBS warns against using the statistical information related to the area of confiscated and shoveled land. Respondents usually intend to report incomplete information about the area of confiscated or shoveled land.

### Press Release on the Impact of Separation Wall on the Localities that the Wall Passed Through, 2003

#### Due to separation wall, Israel confiscated 165 thousands donums in 76 localities, displaced 2,323 persons, and hanged 42,097 persons between the separation wall and the green line

PCBS conducted a locality survey in the Palestinian localities where the separation wall passes through. The survey covered Jenin, Tulkarem, Salfit, Qalqilia, Jerusalem, and Bethlehem. This survey is a part of the surveillance system to monitor the impact of Israeli measures on the well being of the Palestinian people. Fieldwork took place during August 2003 and covered 76 localities.

The main findings indicate that 402 households were displaced due to separation wall, of which 113 in Jenin. Total displaced persons are 2,323 of whom 1,138 males and 1,185 females. The wall left 12,482 households between the wall and the green line, of which 1,119 households from Tulkarem Governorate. Total number of persons left between the green line and the separation wall amounted 42,097 (20,408 males and 21,689 females).

The results indicate that Israeli forces confiscated the land of 26 localities by military decision, while annexation was implemented in 18 localities and in 31 localities both ways were used.

The total number of buildings became behind the wall (in the western part) amounted 2,438 of which 982 in Tulkarem. On the other hand 10 buildings of 810 m<sup>2</sup> were totally destroyed. The estimated loss amounted 129 thousands US\$, against 14 buildings of 260 m<sup>2</sup> were partially destroyed with an estimated loss of about 52 thousands US\$.

The results reveal that 40,460 donums Government land, and 124,323 donums of private ownership land were confiscated. Most of the private confiscated land were cultivated by olive trees (62,623 donums), followed by field crop cultivation (18,522 donums), then pasture land (9,800 donums) and then citrus cultivation (8,008 donums). The results reveal also that 1,296 donums Government land, and 21,002 donums of private ownership land were shoveled. Most of the shoveled land were cultivated by olive trees, crop cultivation and citrus cultivation.

Total number of establishment became behind the wall amounted 750, 0f which 473 in Tulkarem, while 27 establishments of  $11,500 \text{ m}^2$  were destroyed. The estimated loss amounted 130 thousands US\$, and total employees used to work in these establishments were 80.

The total infrastructure losses amounted to 10,700 thousands US\$, of which 280 thousands due to destroyed wells, 4417 thousands due to destroying road network, 119 thousands for destroyed water network, and 194 thousands for destroyed electricity network.

Forty two localities reported to receive assistance from PNA, 40 localities reported to receive aid from UNRWA, and 23 reported to received aid from Palestinian private sector.

As for the obstacles faced on population mobility, 59 localities reported that time spent to pass from and to the locality is considered an obstacle, while 37 localities reported that timing of passage is an obstacle.

The results reveal also that 30 localities were separated from health services, 22 were separated from schools, 11 were separated from telephone station, 8 localities were separated from the main key of water network, and 3 localities were separated from electricity network transformer.

As for the current priorities of the localities, 33 of them reported the need to upgrade infrastructure, 22 reported the need for work (job opportunities), and 8 localities reported the need for health services as a top priority.

As for the development projects conducted during the last 12 months, the localities reported the implementation of 48 projects in the field of education, 48 infrastructure projects, 42 job creation projects, and 16 projects in the field of health services.

### **Concepts and Definitions**

### Locality:

A permanently inhabited place, with an independent municipal administration or other type of adopted administration.

#### **Deported (Displaced):**

Enforced immigration due to War, Occupation and foreign invasion of countries or as a result of catastrophist, that resulted in displaced, deported original citizen from their home land to other different places.

#### Area of Shoveled land:

Total areas, which were shoveled by Israeli Occupation Forces inside the locality for construction of the separation wall.

#### Area of Confesticated Lands:

The total areas, which were confesticated by Israeli Occupation Forces from the locality lands to construct the separation wall.

#### **Destroyed Greenhouses:**

Number of greenhouses (crops were cultivated under greenhouses to protect it and increase it's productivity), in the Palestinian region which were destroyed during the Israeli aggression on the Palestinian Agricultural Sector for separation wall construction purposes.
