¹ Transition from school to the labor market. This refers to the youth transitional period (15-29 years) as they move from their last school year to a satisfactory and stable job (in terms of job contract and duration). The shift is divided into the following categories:

- **Have not started the transition:** includes youth who are currently inactive and are not enrolled in educational establishment and have no desire to work.
- **Going through the transition:** includes youth who not working currently or are in temporary or unsatisfactory jobs.
- **Completed the transition:** includes youth who are currently in stable or fixed positions.
