Revision to Palestine's labour underutilization statistics

Following ILO technical assessment mission in 2018, the PCBS implemented revisions to the concepts and definitions underpinning labour underutilization statistics, which the PCBS will release as of the first quarter of 2019. These methodological changes were carried out in order to bring PCBS statistics fully in line with the latest international standards pertaining to labour underutilization statistics, established by the 19th International Conference of Labour Statisticians (ICLS, 2013). The following indicators were recommended by the 19th ICLS for measuring labour underutilization comprehensively:

(1) Unemployment rate (LU1); the concept of the unemployed was narrowed to include only those who didn't work during the reference period, seek seriously for work and have welling and ability to work. The people who didn't seek work during the last four weeks preceding the interview were excluded from the definition because they will start work in the near future, (Waiting employers reply, have already made arrangements for self-employed, who are waiting for work permits to work in Israel and the Israeli settlements, or have already found work to start later), while previously they were included in the definition of the unemployed. (2) Combined rate of revised unemployment and underemployment (LU2);

(3) Combined rate of revised unemployment and potential labour force (LU3), including discouraged jobseekers; and

(4) Composite measure of labour underutilization (LU4); Refers to the mismatches between labour supply and demand which include: 1. Unemployment rate 2. Time- related underemployment. 3. Potential labour force.

By adopting the latest standards and the full set of labour underutilization indicators, PCBS statistics will provide a more detailed picture of the different forms of labour underutilization in the Palestinian labour market. One important implication is that the PCBS is now applying the strict unemployment measure called for in the 19th ICLS, 2013 resolution (LU1). Discouraged jobseekers – those persons classified as: (1) available for work; (2) not currently seeking work; and (3) having sought work during the past six months – are no longer included in PCBS unemployment estimates. This results in lower estimated unemployment and labour force participation rates. The other measures of labour underutilization listed above will be calculated and disseminated by the PCBS alongside the strict LU1 unemployment rate in order to provide a more comprehensive view of different forms of labour underutilization in Palestine.

For the West Bank, adoption of the strict unemployment rate (LU1) measure results in only a small change in the unemployment estimate, while for Gaza Strip, there is a much larger change. The reason for the large difference in Gaza Strip is that discouragement is widespread – a large number of persons who were previously classified as unemployed are actually discouraged jobseekers. These individuals were previously seeking work and are still available to work, but are no longer actively seeking for a job. Large numbers of discouraged jobseekers in conjunction with a high rate of unemployment reflects the severe labour market distress in Gaza. With little hope to find employment, many jobseekers are giving up on their search for work.

About One Fourth of the participants in the labour force in Palestine are unemployed in the Third quarter of 2022

The number of employed persons increased by 37 thousand in the 3rd quarter of 2022

The number of employed persons (excluding workers abroad) increased from about 1.114 million in the 2nd quarter of 2022 to about 1.151 million in the 3rd quarter of 2022, by 3.3%. This increase came as a result of the increase in the number of employed persons from the West Bank by 3.6% in the 3rd quarter 2022, also the number of employed persons from Gaza Strip increased by 2.4% in the same period.

Decreasing in the number between the 2^{nd} quarter and 3^{rd} quarter of 2022 for employed persons in Israel the number decreased by about 11 thousand. The number of employed persons in Israel reached about 171 thousand employed persons in the 3^{3d} quarter of 2022 compared to about 182 thousand employed persons in the 2^{nd} quarter of 2022, also the number of employed persons in Israeli Settlements decreased from about 29 thousand in the 2^{nd} quarter 2022 to about 27 thousand in the 3^{rd} quarter 2022.

The number of workers in Israel and Israeli settlements increased in constructions by about 14 thousand employed persons, while the number decreased other activities, it decreased in services and other activity¹ by 15 thousand, then commerce and hotels activity it increased by about 6 thousand employed persons, where as the number decreased in transports by about 5 thousand employed persons, agriculture activity decreased by about one thousand, while the number remains at the same level of manufacturing and mining activities during the two quarters.

The average daily wage for the wage employees in Israel and Israeli settlements was about 284 NIS in the 3rd quarter of 2022 compared to 272 NIS in the 2nd quarter of 2022.

An increase in the number of employed persons in the local market between the 2^{nd} quarter and the 3^{rd} quarter of 2022

The number of employed persons in the local market increased from 903 thousand employed persons in the 2nd quarter of 2022 to 953 thousand employed persons in the 3rd quarter of 2022, it increased by 7.1% in the West Bank while it increased by 1.8% in Gaza Strip during the same period.

The results showed that an increase in the number of employed persons during the 3rd quarter of 2022 in the commerce hotels and restaurant activities followed by other services¹, then constructions activity, then transports and storage, while the number decreased in manufacturing industry and mining activities and the agriculture activity.

The average weekly working hours for wage employees in the West Bank was 44.1 hours per week compared to 38.0 hours in Gaza Strip. The average monthly working days was 22.6 working days in the West Bank compared to 22.3 working days in Gaza Strip.

8 out of 10 employed persons are wage employees

77% of employed persons are wage employees, 20% of employed persons are self-employed and employers, and 3% are unpaid family members.

About two third of the wage employees in the private sector were hired without any employment contract.

62% of wage employees in the private sector were hired without any employment contract, and 27% of wage employees receive a contribution to a pension fund/end of service compensation. Moreover, 53% of wage female employees receive a paid maternity leave.

¹ Includes: Public Administration and Defense; compulsory social security, Education, Human health activities, Social work activities, creative, arts and entertainment activities, Libraries, archives, museums and other cultural activities, Sports activities and amusement and recreation activities, activities of membership organizations, other personal service activities, activities of households as employers of domestic personnel and activities of extraterritorial organizations and bodies

40% of wage employees in the private sector receive monthly wage less than the minimum wage (1,880 NIS) in Palestine

The percentage of wage employees in the private sector who receive a monthly wage less than the minimum wage in the West Bank was 19% in the 3rd quarter of 2022 (about 55 thousand employees). The number of wage employees in the private sector who receive a monthly wage less than the minimum wage in Gaza Strip was about 117 thousand of about 90% of wage employees in the private during the same period.

It is worth mentioning that the Council of Ministers issued a decree stating the minimum wage to be (1,880 NIS) as of the beginning of 2022.

The monthly minimum wage in Gaza Strip was (705 NIS) compared with (1,461 NIS) in the West Bank.

One fourth of the labour force participants was unemployed in the 3rd quarter of 2022

The unemployment rate among labour force participants (15 years and above) in the 3rd quarter of 2022 was about 25%, while the total underutilization of labour was about 31%, according to the revised International Labour Organization Standards (ICLS-19th).

There is still a large disparity in the unemployment rate between the West Bank and Gaza Strip, as this rate reached 47% in Gaza Strip compared to 13% in the West Bank. The unemployment rate by sex reached 20% among males compared to 43% among females.

Unemployment Rate (ICLS 19th) by Region, Q2- 2020 – Q3-2022

The number of unemployed persons reached about 378 thousand in the 3rd quarter of 2022; of which 253 thousand persons in Gaza Strip and 125 thousand persons in the West Bank.

The participation rate in the labour force increased slightly to 46% in the 3^{rd} quarter of 2022 compared with 44% in the 2^{nd} quarter of 2022; it increased in Gaza Strip from 40% to 42%, in the West Bank it increased from 47% to 48% at the same period.

The participation rate in the labour force among males was 72% in the 3^{rd} quarter of 2022 compared to 70% in the 2^{nd} quarter of 2022, whereas the participation rate among females was 19% in the 3^{rd} quarter 2022 compared to 18% in the 2^{nd} quarter 2022.

Within the same context, the total underutilisation reached 498 thousand persons, as this number includes 48 thousand discouraged job seekers and 17 thousand in time-related underemployment.

Unemployment rate was the highest among youth graduates

About 50% is the unemployment rate of youth graduates (19-29) years who hold Associate Diploma Certificate and higher; 32% in the West Bank compared to 75% in Gaza Strip.

Concepts and Definitions

Population of Working Age:

All persons aged 15 years and above.

Reference Period:

The week ending on Friday preceding the interviewer's visit to the household.

Labour Force:

All persons aged 15 years and above who are either employed or unemployed.

Employed:

Persons aged 15 years and over who were at work at least one hour during the reference period, or who were not at work during the reference period, but held a job or owned business from which they were temporarily absent (because of illness, vacation, temporarily stoppage, or any other reason) he\ she was employed, unpaid family member or other. The employed person is normally classified in one of two categories according to the number of weekly work hours, i.e. 1-14 work hours and 15 work hours and above. Also the absence due to sick leave, vacation, temporarily stoppage, or any other reason. Employed persons are classified according to employment status as follows:

1.Employer2.Self-employed3. Paid- employed (wage employee)4.Unpaid family member

Time related underemployment:

All persons who were employed during a short reference period and the total actual hours worked in all jobs were less than 35 hours and they wanted to work additional hours, who were available to work additional hours if they given an opportunity for additional work.

Unemployed (ILO Standards ICLS-19th):

Unemployed persons are those individuals aged 15 years and above who did not work at all during the reference period, who were not absent from a job, were available for work and actively seeking a job during the Last four weeks by one of the following methods news paper, registered at employment office, ask friends or relatives or any other method, where Discouraged jobseekers – those persons classified as: (1) available for work; (2) not currently seeking work; and (3) having sought work during the past six months are excluded.

Discouraged jobseekers:

All persons aged 15 years and above who during the reference period were currently available but did not carry out activities to seek employment in the last four weeks because they sought for employment in the last six months and were discouraged to finding a job.

Potential labour force:

All persons aged 15 years and above who during the reference period were neither in employment nor in unemployment were considered as either:

- Unavailable jobseekers: All persons aged 15 years and above who during the reference period carried out activities to seek employment were not currently available.
- 2. Available potential jobseekers: All persons aged 15 years and above who during the reference period were currently available but did not carry out activities to seek employment.
- 3. Willing potential jobseekers:

All persons aged 15 years and above who during the reference period did not carry out activities to seek employment and were not currently available but want employment.

Labour underutilization:

Refers to mismatches between labour supply and demand which include:

- 1. Unemployment rate
- 2. Time- related underemployment
- 3. Potential labour force

Individuals Outside Labour Force:

The individuals not economically active comprises all persons 15 years and above, who were neither employed nor unemployed accordingly to the definitions over. Because they don't have any desire to work or because of the availability of another source of income.

Unpaid trainee:

The person who performed any unpaid work to produce goods and services for others, in order to acquire experience or skills in the workplace in order to be able to find jobs, transportation or allowance or meals or gifts that offered to trainee are not considered as wage

Own-use production:

The person who performed any activity to produce goods or provide services for own final consumption or for his/ her family consumption, including producing or processing for storage agricultural, fishing, hunting and gathering products, and manufacturing household goods (clothing, food, and furniture).

Volunteer work:

The person in volunteer work are who performed any unpaid activity, non compulsory activity to produce goods or provide services for others, it includes work done through, or for, self help, mutual aid or community based groups of which volunteer is a member, which transportation allowance or meals or gifts that offered to volunteer are not considered as wage, and unpaid work required as part of education or training programmers are excluded from volunteer work
