It divides these other investments into stocks of trade credit, loans, currency and deposits and any other assets or liabilities), in addition to the Reserve Assets, i.e. Stocks held by the Central Banks/ Monetary Authorities to address the imbalances in the balance of payments, it is worth mentioning that the reserve assets are only included in the asset side.

The External Debt is an accounting sheet that records the debt stocks on Palestinian economic sectors due to non-residents. These include (loans from non-residents, the deposits of the non-residents deposited in the banks sector in Palestine, the Palestinian bonds purchased by non-residents, debt transactions between the non-resident enterprises and fellow enterprises in Palestine. They encompass as well any other liabilities on Palestinian economy) the data of external debt have been extracted from the liabilities side in the international investment position matrix (debt items). Preparing, classifying and publishing of the data are based on (External Debt Statistics Manual) issued by IMF in 2003, this manual is harmonized with 5<sup>th</sup> edition of Balance of Payments and International Investment Position Manual
